DIRECTIVE TO SUBMIT R.S 2477 REPORT

Exhibit

A . . . . . H.R. REP. NO. 901, 102d Cong., 2d Sess. 71 (1992)

102D CONGRESS
2d Session | HOUSE OF REPRESENTATIVES | REPORT
102-901

MAKING APPROPRIATIONS FOR THE DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES, FOR THE FISCAL YEAR ENDING SEPTEMBER 30, 1993, AND FOR OTHER PURPOSES

SEPTEMBER 21, 1992.—Ordered to be printed

Mr. YATES, from the committee of conference, submitted the following

CONFERENCE REPORT

[To accompany H.R. 5503]

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5503) "making appropriations for the Department of the Interior and Related Agencies, for the fiscal year ending September 30, 1993, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 11, 20, 24, 25, 29, 30, 34, 35, 58, 60, 63, 64, 65, 66, 75, 79, 81, 82, 83, 88, 91, 98, 100, 105, 119, 123, 129, 134, 140, 142, 146, 147.

That the House recede from its disagreement to the amendments of the Senate numbered 4, 5, 6, 9, 13, 14, 15, 16, 17, 27, 32, 36, 40, 41, 42, 43, 45, 46, 49, 50, 51, 52, 53, 56, 59, 67, 68, 71, 76, 96, 106, 114, 115, 116, 117, 118, 121, 122, 125, 127, 130, 149, 151, 152, 153, 155, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert the following: *$544,877,000*; and the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert: *$544,877,000*; and the Senate agree to the same.

Amendment numbered 3:

Amendment No. 151: Deletes House language, as proposed by the Senate which would have prohibited the use of funds for the sale of timber on National Forest Lands in Texas which would be exported by the purchaser.

Amendment No. 152: Changes the section number as proposed by the Senate.

Amendment No. 153: Deletes House provision stricken by the Senate mandating reductions to various accounts in the bill as proposed by the Senate.

Amendment No. 154: Restores House proposed Buy American requirements stricken by the Senate and changes section number.

Amendment No. 155: Deletes House proposed language that would have prohibited the use of funds to process rights of way claims under section 2477 of the Revised Statutes, as proposed by the Senate.

The managers agree that by May 1, 1993, the Department of the Interior shall submit to the appropriate committees of the Congress a report on the history of rights of way claimed under section 2477 of the Revised Statutes, the likely impacts of current and potential claims of such rights of way on the management of the Federal lands, on the access to Federal lands, private lands, State lands, Indian and Native lands, on multiple use activities, the current status of such claims, possible alternatives for assessing the validity of such claims and alternatives to obtaining rights of way, given the importance of this study to the Western public land States. In preparing the report the Department shall consult with Western public lands States and other affected interests.

The managers expect sound recommendations for assessing the validity of claims to result from this study, consonant with the intent of Congress both in enacting R.S. 2477 and FLPMA, which mandated policies of retention and efficient management of the public lands.

Such validity criteria should be drawn from the intent of R.S. 2477 and FLPMA.

The managers further expect that any proposed changes in use of a valid right of way shall be processed in accordance with the requirements of applicable law.

Amendment No. 156: Inserts Senate finding regarding corporate responsibility and changes section number. The House had no similar provision and the managers on the part of the House take no position on the Senate finding.

Amendment No. 157: Includes language proposed by the Senate which authorizes the Secretary of the Interior to remove restrictions applicable to the use of real property located in Halawa, Ewa, Island of Oahu, State of Hawaii as set forth in the quitclaim deed from the United States of America dated June 30, 1967. The managers have amended the provision so that the removal of the restrictions shall not be effective until the city and county of Honolulu have dedicated in perpetuity an equal amount of additional land for public park and public recreation uses.

Amendment No. 158: Includes language proposed by the Senate amended to change the section number, and to change the Senate language which was limited to Forest Service appeals, to provide an expanded Forest Service decision-making and appeals

Instruction Memorandum No. 93-113
Expires 9/30/94

To: All State Directors

From: Director

Subject: Washington Office (WO) Notification of RS 2477 Acknowledgements

Instruction Memorandum 93-32, dated October 27, 1992 informed all State Directors (SD) of the Bureau of Land Management's (BLM) assignment to report to the appropriate committees of Congress on several aspects of management of rights-of-way authorized by Revised Statue (RS) 2477.

Until such time as the report is completed, the BLM will acknowledge RS 2477 assertions in a most prudent manner. Assertions should only be examined when the State and/or local governmental entities have shown a compelling and immediate need to have a road acknowledged as a RS 2477 highway. When such an assertion is made, the WO Division of Lands, (WO-260) shall be notified, and will coordinate this information with the Division of Congressional Affairs. Using the information from the field, the appropriate Congressional committees will be notified of BLM's acknowledgement of the subject road as an RS 2477 highway.

When notifying WO-260 of an assertion, include a brief explanation of the relevant facts, and a map of the road and surrounding area. Telephone and/or fax the information to WO-260 as soon as possible, then follow-up with all the supporting documentation. When faxing information, please direct it to WO-260, Attention, Ron Montagna, at (202) 653-9117.

We consider RS 2477 issues to be of the highest priority. Therefore, the notification of the appropriate Congressional committees on the acknowledgement of RS 2477 assertions will be handled in a timely manner.

Your cooperation in this effort is greatly appreciated. Any questions regarding this assignment or RS 2477 questions in general, should be directed to Ron Montagna, WO-260 at (202) 653-9215.

Land and Renewable Resources

RIGHT OF WAY—HIGHWAY—SECTION 2477, R. S.

DOUGLAS COUNTY, WASHINGTON.

264D
446

It was not intended by section 2477 of the Revised Statutes to grant a right of way for highways over public lands in advance of an apparent necessity therefor.

Secretary Bliss to the Commissioner of the General Land Office, March 31, 1898.

(W. V. D.)

With their letter of April 10, 1897, the local officers at Waterville, Washington, transmitted to your office a certified copy of an order of the board of county commissioners of Douglas County, Washington, purporting to be an acceptance of rights of way claimed to be granted by section 2477 of the Revised Statutes, and asking that the right of way so granted and accepted be made a matter of reservation in all subsequent patents issued for lands affected thereby.

Your office considered the matter, on April 28, 1897, and held that the statute does not authorize the exclusion of such right of way from patents issued for lands subject to such an easement. The county commissioners have appealed to the Department.

Section 2477 of the Revised Statutes is as follows:

The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

Claiming to act under authority of the laws of the State of Washington, the board of county commissioners of Douglas county, in that State, passed the following order:

BE IT REMEMBERED: That, on the 6th day of April A. D. 1897, at a regular meeting of the board of county commissioners of Douglas county, State of Washington, said meeting being duly held and all members of said board being present, on motion, it was ordered that the right of way for the construction of highways over public lands, as granted by act of Congress (Section 2477 Revised Statutes), be accepted, and the same is hereby accepted, as far as said grant relates to said Douglas county, that is to say to the extent of thirty feet (30) on each side of all section lines in said county; it is hereby declared that all section lines in said county shall be, and the same are hereby declared to be, the center lines of highways and public roads in said county, wherever said section lines are bounded by public lands, and said highways are hereby declared to be sixty feet (60) in width; wherever any such section line shall be found to lie between public land on one side and private land on the other, such highway shall be sixty feet in width, and be wholly on such public land and bounded on one side by such section line.

It is further ordered that E. K. Pendergast, prosecuting attorney, for said county and state, file a certified copy of this order in the United States Land Office at Waterville, Washington, and take all necessary steps to have the Hon. Commissioner of the General Land Office exclude such easement and right of way from all patents issued for lands in said county, which shall be claimed or settled upon subsequent to the date hereof.

Dated this 6th day of April A. D., 1897.

It is urged on appeal that it is the duty of the land department of the government to execute this statute, that it authorizes the exclusion of the right of way thereby granted from patents issued for lands to which an easement may have attached by virtue thereof, and that the propriety of such action is manifest.

The declaration by the board of county commissioners, that highways shall be extended along all section lines designated by the public surveys in said county sixty feet in width, that where the section lines are bounded on both sides by public lands, such section lines shall be the center of the highway, and that where any such section line shall be found to lie between public land on one side and private land on the other, the highway shall be wholly on such public land and bounded on one side by such section line, embodies the manifestation of a marked and novel liberality on the part of the county authorities in dealing with the public land.

There is no showing of either a present or a future necessity for these roads or that any of them have been actually constructed, or that their construction and maintenance is practicable. Whatever may be the scope of the statute under consideration it certainly was not intended to grant a right of way over public lands in advance of an apparent necessity therefor, or on the mere suggestion that at some future time such roads may be needed.

If public highways have been, or shall hereafter be, established across any part of the public domain, in pursuance of law, that fact will be shown by local public records of which all must take notice, and the subsequent sale or disposition by the United States of the lands over which such highways are established will not interfere with the authorized use thereof, because those acquiring such lands will take them subject to any easement existing by authority of law.

The decision appealed from is affirmed.

56 I.D. 533

REGULATIONS GOVERNING RIGHTS-OF-WAY FOR CANALS, DITCHES, RESERVOIRS, WATER PIPE LINES, TELEPHONE AND TELEGRAPH LINES, TRAMROADS, ROADS AND HIGHWAYS, OIL AND GAS PIPE LINES, ETC.

[Circular 1237a]

UNITED STATES DEPARTMENT OF THE INTERIOR,
GENERAL LAND OFFICE,
May 23, 1938.

GENERAL REGULATIONS APPLICABLE TO ALL RIGHT-OF-WAY APPLICATIONS MADE UNDER THE REGULATIONS CONTAINED IN THIS CIRCULAR

1. *Application.*—No special form is required, but it should be filed at the land office for the district in which the land is located, should state the act invoked and the primary purpose for which the project is to be used. If there is no local land office, the application should be filed with the Commissioner of the General Land Office, Washington, D. C.

2. *Showing required of corporations.*—Application by a private corporation must be accompanied by a copy of its charter or articles of incorporation, duly certified to by the proper State official of the State where the corporation was organized; also an uncertified copy.

Agriculture for his determination that the lands are necessary for right-of-way for the highway or road-building material site purpose, as required by the act.

RIGHTS-OF-WAY FOR ROADS AND HIGHWAYS OVER PUBLIC LANDS

54. *Statutory authority.*—By section 2477, U. S. R. S., 43 U. S. C. 932, it is provided:

The right-of-way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

55. *When grant becomes effective.*—This grant becomes effective upon the construction or establishing of highways, in accordance with the State laws, over public lands not reserved for public uses. No application should be filed under the act, as no action on the part of the Federal Government is necessary.

RIGHTS-OF-WAY THROUGH PUBLIC LANDS AND RESERVATIONS FOR OIL AND NATURAL GAS PIPE LINES AND PUMPING PLANT SITES

552

FRED W. JOHNSON,
Commissioner.

I concur:
W. C. MENDENHALL,
Director of Geological Survey.

Approved: May 23, 1938.
OSCAR L. CHAPMAN,
Assistant Secretary.

an instruction in the Bureau of Reclamation manual which is an unpromulgated intrabureau manual of instruction, which has never received the approval of the Secretary of the Interior. The Board must conclude that the contracting officer was not authorized to extend the time for filing a notice of delay, and that, therefore, his consideration of the causes of delay on the merits did not serve to waive the requirement of notice."

The contractor requests that if its delay in performance of the contract is found to be inexcusable under Article 9 thereof, the liquidated damages of $21,250 assessed against it be waived in accordance with the provision of section 10(a) of the act of September 3, 1950 (64 Stat. 578, 591; 41 U. S. C., 1952 ed., sec. 256a), which authorizes the Comptroller General, on the recommendation of an agency head to remit liquidated damages in whole or in part "as in his discretion may be just and equitable."[8] The Board is, however, not authorized to make such recommendations to the Comptroller General. This function is vested in the Solicitor of the Department by section 27 of Order No. 2509, Amendment No. 16.

Conclusion

Therefore, pursuant to the authority delegated to the Board of Contract Appeals by the Secretary of the Interior (sec. 21, Order No. 2509, as amended; 19 F. R. 9128), the decision of the contracting officer denying the contractor's requests for additional extensions of time is affirmed, and the contractor's request that a recommendation be made to the Comptroller General that the liquidated damages be remitted is referred to the Solicitor for his consideration.

Thurston H. Hans, *Chairman.*
Thomas C. Barrington, *Member.*
William Seagle, *Member.*

LIMITATION OF ACCESS TO THROUGH-HIGHWAYS CROSSING PUBLIC LANDS

Rights-of-way: Revised Statutes sec. 2477

A throughway or limited-access type of highway may be established across the public lands, under Rev. Stat. sec. 2477 and the regulations (43 CFR 211.57

[8] It should be noted that this question cannot arise under Paragraph 5 (c) of Standard Form 23A (March 1953), which permits the contracting officer to extend the times for filing notices of delay without the concurrence of the head of the Department. The Board has considered the question although not essential to its decision because its decision on the same question in *Campbell Construction & Equipment Co.*, IBCA 2 (January 11, 1955) (62 I. D. 6), has been attacked as incorrect, and the same question may arise in another appeal.

[9] Officials of this Department do not have any authority to waive the imposition of liquidated damages on equitable grounds. *See Royal Indemnity Co. v. United States*, 313 U. S. 289, 294 (1941); *McCann Construction Co.*, 61 I. D. 342 (1954).

211.59). The United States as grantor does not have any special right of access to such highways, other or different from that accorded other abutting owners under State law. Persons subsequently acquiring the abutting lands from the United States likewise do not have any special right of access which the State need consider for the purpose of eliminating by purchase or otherwise.

Rights-of-way: Act of November 9, 1921

A throughway or limited-access highway may be established on public lands under sec. 17 of the Federal Aid Highway Act, and the regulations (43 CFR 211.51-211.58). The Secretary of the Interior probably could reserve a special right of access to such highway if necessary to his administration of the public lands as a condition of his certification of the land for disposition to the State for highway purposes. In the absence of a special reservation, the United States as owner of the abutting lands, is subject to the same limitations on access to the highways as other adjoining owners under State law; and persons subsequently deriving title from the United States are subject to the same limitations. The Secretary of the Interior may surrender to the State a reserved right of access prior to disposing of the abutting lands.

M-36274

April 15, 1955.

To the Director, Bureau of Land Management.

You have informally referred to me the correspondence from Mr. E. H. Brunner, Right-of-Way Engineer of the Idaho Highway Department, together with your proposed reply thereto and a proposed memorandum for the information of Bureau officials on the above subject.

Mr. Brunner writes that the State of Idaho in acquiring rights-of-way for the Interstate Highway System, so far as it crosses Federal lands in Idaho, would also like to acquire rights from the abutting Government land in order to provide for a safer highway. For this purpose Mr. Brunner asked the Manager of the Land and Survey Office at Boise to add the following clause to a certification of right-of-way withdrawal of Government land:

In the event Federal statutes are amended, giving the right to grant access rights along with rights-of-way, this withdrawal shall be considered as also granting all access rights, present and future, across the above listed subdivisions.

The manager properly indicated his lack of authority to sign the certification as requested and the matter has been referred to you. By "withdrawal" Mr. Brunner obviously means an appropriation and transfer of Federal land under section 17 of the Federal Aid Highway Act (see 43 CFR 211.51 (a) (21)).

The questions and problems posed by Mr. Brunner's letter and enclosures are common to the highway departments of other Western States where highways must cross large stretches of public land. The problem is that in constructing a limited access highway whether

as part of the inter-state highway system or otherwise, the highway departments desire to acquire from the Government the right of way for such highway over and across the public lands; and to acquire also the right of access to such highway from the abutting Government land while it is in Government ownership so as to preclude the unrestricted exercise of such rights when title to the abutting lands has passed into private ownership thus avoiding the necessity of the States' purchasing such rights from the Government's successors in interest. Mr. Brunner's suggested access clause is intended as a stop gap measure pending the enactment of legislation authorizing the grant of access rights. The questions involved may be simply stated as follows:

1. May a freeway or limited access type of highway be constructed over the public lands?
2. Does the United States (and its successors in interest) as owner of lands abutting such highway have special rights of access thereto?
3. If it does, is legislation necessary to authorize the Government to surrender to the States its access rights to such highway?

This memorandum will touch only briefly upon the Government's right of access to the ordinary, conventional or "land service" highway running across public lands. I will not discuss the situation where a conventional highway is converted under State authority into a limited access highway, but my answer will be restricted to new freeways constructed on public lands administered by the Bureau of Land Management where no highway previously existed. My answers follow:

1. A limited access highway may be constructed over public lands either under Rev. Stat., sec. 2477, or under section 17 of the Federal Aid Highway Act of 1921, *infra*.
2. Except as hereinafter indicated with respect to Federal Aid Highways, the United States does not have any special right of access to such freeways other or different from that accorded to other abutting owners under State Law.
3. As to such limited access highways no special legislation is necessary to authorize the surrender to the States of the Government's right of access, if any. Nor is the special access clause suggested by Mr. Brunner necessary pending enactment of such legislation.

An easement of access is defined as the right which an abutting owner has of ingress and egress to and from his premises other than the public easement in the street or roadway. *Chicago & N. W. Ry. Co. v. Milwaukee, L. & W. Electric Ry. Co.*, 70 N. W. 678 (Wis., 1897)

Thus owners of land abutting upon a highway have the right to use and enjoy the highway in common with other members of the public; and in addition they have an easement of access to their lands abutting upon the highway arising from ownership of such land contiguous to the highway which "easement of access" does not belong to the public generally. *State Highway Board v. Baxter*, 141 S. E. 796 (Ga. 1928). These rights usually arise in connection with the ordinary, conventional or "land service" highway as distinguished from the "traffic service" or limited-access highway.

The limited access highway has been developed in recent years by highway authorities to provide rapid transit for through traffic, uninterrupted and unendangered by vehicles or pedestrians from private roads and intersecting streets and highways, thereby providing a maximum of economy, efficiency and safety. Limited access highways, also designated as freeways, throughways, expressways, controlled access highways, etc., are so constructed or regulated that an abutting owner cannot directly enter the highway from his property or enter his property from the highway. Users of such highways gain access thereto at specified controlled access points which they may reach by a circuitous route or by a service road paralleling the main highway.

There are two statutes of concern to us in the administration of the public lands under which highway rights-of-way may be acquired. They are Rev. Stat., sec. 2477 (43 U. S. C. sec. 932; 43 CFR 244.57 244.59), and section 17 of the Federal Aid Highway Act of 1921 (23 U. S. C. sec. 18; 43 CFR 244.54–244.56).

Section 2477 is an unequivocal grant of the right-of-way for highways over the public lands without any limitation as to the manner of their establishment. *Smith v. Mitchell*, 58 Pac. 667 (Wash., 1899). The grant becomes fixed when a public highway is definitely established in one of the ways authorized by the laws of the State where the land is located. *State v. Nolan*, 191 Pac. 150 (Mont., 1920); *Moulton v. Irish*, 218 Pac. 1053 (Mont., 1923). The act did not specify nor define the extent of the grant contemplated over the public lands, the width of the right-of-way nor the nature and extent of the right thus conferred, both as against the Government and subsequent patentees (21 L. D. 351 (1895)). Whatever may be construed as a highway under State law is a highway under Rev. Stat., sec. 2477, and the rights thereunder are interpreted by the courts in accordance with the State law. The lands over which the right of way is located may be patented to others subject to the easements and to whatever rights may flow to the State and to the public therefrom. *Evans v. McCarthy*, 11 L. D. 105 (1892).

Clearly, a limited access highway as established under State law is within the purview of Rev. Stat., sec. 2477. It is probable also that upon the establishment of such limited access highway, the United States as an abutting land owner would have no right of access to the highway different or greater than would any other land owner; and any successor in interest of the United States would likewise have no special right of access which it would be necessary for the State to acquire by purchase or otherwise.

Similarly the Federal Aid Highway Act does not define nor limit the nature or the extent of the right of way of public lands which may be appropriated under section 17 (except as to the provision in section 9 of that act (23 U. S. C. sec. 10) relating to the width of the right-of way and adequacy of the wearing surface). A limited-access highway is therefore within the purview of section 17. The Department has held that the right-of-way granted under this act is merely an easement; and consequently a subsequent patent would be subject to the highway easement.

Since freeways or limited access highways are of fairly recent origin, there has been little court made law on the subject. It is generally recognized, however, that statutes providing for limited access to highways arise as an exercise of the State's police power for the promotion of public safety and of the general welfare. (3 Stanford Law Review, 1951, p. 303.) Such statutes are in existence in several of the Western States including Colorado, California, Oregon, and Utah. It has been stated that where an ordinary or conventional road is built there may be an intent to serve abutting owners, but when a freeway is established the intent is just the opposite, and a resolution creating a freeway gives adequate notice that no new rights of access will arise unless they are specifically granted. (3 Stanford Law Review, 1951, pp. 298, 300, 308.)

A freeway has been defined as a highway in respect of which the owners of abutting lands have no right or easement of access to or from their abutting lands or in respect of which such owners have only restricted or limited right or easement of access. Thus a highway commission's condemnation resolution for a limited access freeway did not create in the abutting owner's property a new right of access to a freeway to be constructed where no highway, conventional or otherwise, had existed before. *People* v. *Thomas et al.*, 239 P. 2d 914 (Calif., 1952). The easement of access applies to rights in existence prior to the establishment of the freeway and to claimed rights which had no previous existence, but which come into being, if at all, only by virtue of the new construction. The California courts have held that where a statute authorizing freeways provides for creation of a freeway on lands where a public way had not previously existed,

it does not create rights of direct access in favor of abutting property which prior to the new construction had no such right of access. *Schaider Corp.* v. *State*, 241 P. 2d 1 (Calif., 1952).

The precise question of the nature and extent of the Government's right of access to a new limited access highway on public lands has not previously been raised before this Department, nor has it been considered by the Courts so far as I know. As already stated, neither Rev. Stat., sec. 2477 nor the Federal Aid Highway Act contains any qualification as to the nature of the grant and of the rights thereunder. In the absence of express reservation in the right-of-way grant (or in the conditional certification of a section 17 highway), it would appear that the United States would retain no right of access unless such right was granted by State law since its position would be that of a land owner only. Such right after conveyance by the United States would be governed by the rule in *Packer* v. *Bird*, 137 U. S. 661, 669 (1891), that whatever incidents or rights attach to property conveyed by the Government will be determined by the laws of the States in which situated, subject to the condition that their rules do not impair the efficacy of the grants or the use and enjoyment of the property by the grantee. It was held in the cited case that where a State law denies riparian rights to private land owners a grantee of the United States would acquire none with the grant. The right of access here involved would seem to be in like case.

In the circumstances therefore the State courts would undoubtedly consider the United States as a landowner in the same position as any other adjoining landowner, and the same rules of construction would be applied to it. It would follow that if under State law a private landowner has no right of access to a limited-access highway except as specifically provided, the United States likewise has no such easement from its lands. If the United States has no right of access, clearly persons subsequently deriving or claiming from or through the United States would have no such property rights in the highway which the State need consider or pay compensation for its elimination. The latter question, however, is one for the State courts when and if presented in a proper case. Suffice it to say that, in my view, the Government has no special rights of access to limited-access highways newly established under either of the two cited statutes on public lands under the administration of the Bureau of Land Management.

A complication could arise, however, in the situation where the Secretary of Commerce determines that public lands are necessary for a limited access highway and the Secretary of the Interior as a condition to his certification of such lands wishes to reserve the right of access to or across the highway. If the Secretary of the Interior as a necessary incident to the management of the adjacent public

lands found it necessary to retain the Government's right of access to or across the proposed highway it may be that he could make it a condition for his certification of the land for appropriation and transfer. The complication could arise when the abutting land is disposed of, if the Secretary did not voluntarily surrender such right of access to the State, prior to the patenting of the land or the establishment of valid rights to the land. In the absence of such conditions, the Government and its successors would have no right of access to the highway except at the control points or as otherwise provided by State law.

Another problem in public land administration will undoubtedly arise from the practical effect which a limited access highway has of cutting a legal subdivision upon which it is located into two separate parcels because of the restriction upon the settler's or applicant's right to enter and cross the highway without difficulty to reach and utilize a parcel on the other side of the road.

I do not think it necessary to comment on the proposed legislation prepared by a special commission of State highway officials particularly section 6 relating to granting of access rights which Mr. Brunner submitted merely for your information. Further, in view of the conclusion I have reached on the basic questions, I do not believe it is necessary to discuss the discretionary authority of the Secretary under section 7 of the Taylor Grazing Act and other laws to insert access limiting stipulations in patents or other disposals whose allowance is discretionary, as indicated in your proposed reply. Your reply should be drafted consistent with the views herein expressed.

C. R. Branshaw,
Acting Assistant Solicitor,
Branch of Land Management.

Approved:
James D. Parmiter, Jr.,
Associate Solicitor,
Division of Public Lands.

APPEAL OF A. G. McKINNON, D/B/A McKINNON CONSTRUCTION CO

IBCA-4 *Decided April 23, 1953*

Contracts: Additional Compensation—Contracts: Specifications

Where a contract provided for the excavation of a particular section of a channel in accordance with specifications and drawings, and the requirements of the work were reasonably ascertainable from the drawings relating to that section of the canal and a related drawing which showed that there was much more material on one side of the centerline of the channel than on the other side and that the embankments were designed to be approximately equal and to conform to a freeboard of [illegible] which would require the embankments to be a minimum height of 18 feet above the bottom grade of

the channel if allowance was also to be made for a freeboard, the contractor is not entitled to additional compensation for equalizing the embankments to the necessary minimum height, notwithstanding the omission of the 18 foot dimension on one of the drawings, and its revision by the contracting officer to show the omitted dimension, at a time when the contractor had virtually completed the excavation work on that section of the canal.

Contracts: Contracting Officer

The findings of a contracting officer will be presumed to be correct in the absence of contrary proof by the contractor.

Contracts: Additional Compensation—Contracts: Specifications

A contractor who was required to lengthen and reconstruct a bridge in accordance with unit prices stipulated in a schedule for erecting salvaged timber in structures, removing timber in existing structures, and salvaging timber, was not entitled to additional compensation for removing the center span of the existing bridge prior to the construction of the center pile bent for the lengthened bridge, and replacing the center span in its original position, when the removal of the center span was a necessary operation in reconstructing the bridge, and no provision for payment for this work was contemplated by the contract.

BOARD OF CONTRACT APPEALS

A. G. McKinnon, d/b/a McKinnon Construction Company, Sandy, Oregon, appealed on May 25, 1953, from the findings of fact and decision of the contracting officer denying two separate claims arising out of construction work under Contract No. 12r 19806 with the Bureau of Reclamation. The contract is identified as "Earthwork and Structures, East River Channel Improvements, West Canal Enlargement, W-1 Lateral, Langell Valley, Specifications No. DC-3682, Modoc Unit, Tule Lake Division, Klamath Project, Oregon-California."

The two claims, which will be considered separately in this decision, are for (1) $12,115 alleged to be due for extra work in depositing excavated material in embankment construction between Stations 370+ and 325+, and (2) $1,330 for the removal and replacement of the center span of a bridge structure.

Following the issuance of the contracting officer's findings of fact and decision on April 9, 1953, the contractor in his notice of appeal requested a hearing before the Solicitor of the Department of the Interior. The Solicitor designated a hearing examiner, and a hearing was held in Portland, Oregon, on June 21 and 22, 1951. Subsequent to the hearing the examiner filed a recommendation that the claim of the contractor be denied. This recommendation, the transcript of the hearing which runs to 160 pages, as well as extensive briefs by both the Government and the contractor, have been studied by the Board.

propriation and release to the State or its nominee of all rights of the United States, as owner of underlying and abutting lands, to cross over or gain access to the highway from its lands crossed by or abutting the right-of-way, subject to such terms and conditions and for such duration as the authorized officer of the Bureau of Land Management deems appropriate.

§ 2821.6 Additional rights-of-way within highway rights-of-way.

A right-of-way granted under this subpart confers upon the grantee the right to use the lands within the right-of-way for highway purposes only. Separate application must be made under pertinent statutes and regulations in order to obtain authorization to use the lands within such rights-of-way for other purposes. Additional rights-of-way will be subject to the highway right-of-way. Future relocation or change of the additional right-of-way made necessary by the highway use will be accomplished at the expense of the additional right-of-way grantee. Prior to the granting of an additional right-of-way the applicant therefor will submit to the Authorized Officer a written statement from the highway right-of-way grantee indicating any objections it may have thereto, and such stipulations as it considers desirable for the additional right-of-way.

[39 FR 39440, Nov. 7, 1974]

§ 2821.6–1 General.

No application under the regulations of this part is required for a right-of-way within the limits of a highway right-of-way granted pursuant to Title 23, United States Code, for facilities usual to a highway, except (a) where terms of the grant or a provision of law specifically requires the filing of an application for a right-of-way, (b) where the right-of-way is for electric transmission facilities which are designed for operation at a nominal voltage of 33 KV or above or for conversion to such operation, or (c) where the right-of-way is for oil or gas pipelines which are part of a pipeline crossing other public lands, or if not part of such a pipeline, which are more than two miles long. When an application is not required under the provisions of this subparagraph, qualified persons may appropriate rights-of-way for such usual highway facilities with the consent of the holder of the highway right-of-way, which holder will be responsible for compliance with § 2801.1–5, in connection with the construction and maintenance of such facilities.

§ 2821.6–2 Terms of grant.

Except as modified by § 2821.6–1 of this subpart, rights-of-way within the limits of a highway right-of-way granted pursuant to Title 23, United States Code, and applications for such rights-of-way, are subject to all the regulations of this part pertaining to such rights-of-way.

(43 U.S.C. 1371)

Subpart 2822—Roads Over Public Lands Under R.S. 2477

SOURCE: 35 FR 9646, June 13, 1970, unless otherwise noted.

§ 2822.0–3 Authority.

R.S. 2477 (43 U.S.C. 932), grants rights-of-way for the construction of highways over public lands, not reserved for public uses.

§ 2822.1 Applications.

§ 2822.1–1 For unreserved public lands.

No application should be filed under R.S. 2477, as no action on the part of the Government is necessary.

§ 2822.1–2 Procedure when reserved land is involved; rights-of-way over revested and reconveyed lands.

(a) *Showing Required.* When a right-of-way is desired for the construction of a highway under R.S. 2477 over public land reserved for public uses, and such reserved land is under the jurisdiction of the Department of the Interior, and when a right-of-way is desired for the construction of a highway under R.S. 2477 over the Revested and Reconveyed Lands, an application should be made in accordance with § 2802.1. Such application should be accompanied by a map, drawn on trac-

ing linen, with two print copies thereof, showing the location of the proposed highway with relation to the smallest legal subdivisions of the lands affected

(b) *Revocation or modification of withdrawal.* Where reserved lands are involved, no rights to establish or construct the highway may be acquired before the reservation is revoked or modified to permit construction of the highway, subject to terms and conditions, if any, as may be deemed reasonable and necessary for the adequate protection and utilization of the reserve and for the protection of the natural resources and the environment.

(c) *Revested and Reconveyed Lands.* Where Revested and Reconveyed Lands are involved, no rights to establish or construct the highway will be acquired by reason of the filing of such application unless and until the authorized officer of the Bureau of Land Management shall grant permission to construct the highway, subject to such terms and conditions as he deems necessary for the adequate protection and utilization of the lands, and for the maintenance of the objectives of the act of August 28, 1937 (50 Stat. 874, 43 U.S.C. 1181a).

[35 FR 9646, June 13, 1970, as amended at 39 FR 39440, Nov. 7, 1974]

§ 2822.2 Nature of interest.

[39 FR 39440, Nov. 7, 1974]

§ 2822.2-1 Effective date of grant.

Grants of rights-of-way under R.S. 2477 are effective upon construction or establishment of highways in accordance with the State laws over public lands that are not reserved for public uses.

[39 FR 39440, Nov. 7, 1974]

§ 2822.2-2 Extent of grant.

A right-of-way granted pursuant to R.S. 2477 confers upon the grantee the right to use the lands within the right-of-way for highway purposes only. Separate application must be made under pertinent statutes and regulations in order to obtain authorization to use the lands within such rights-of-way for other purposes. Additional rights-of-way will be subject to the highway right-of-way. Future relocation or change of the additional right-of-way made necessary by the highway use will be accomplished at the expense of the additional right-of-way grantee. Prior to the granting of an additional right-of-way the applicant therefor will submit to the Authorized Officer a written statement from the highway right-of-way grantee indicating any objections it may have thereto, and such stipulations as it considers desirable for the additional right-of-way. Grants under R.S. 2477 are made subject to the provisions of § 2801.1-5 (b), (c), (d), (e), (i), and (k) of this chapter.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2800

Federal Land Policy and Mangement Act; Management of Rights-of-Way and Related Facilities on Public Lands and Reimbursement of Costs

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking establishes procedures for the management of all rights-of-way on public lands except for: oil, natural gas and petroleum product pipelines; Federal Aid Highways; cost-share roads; and access to mining claims. Title V of the Federal Land Policy and Management Act of 1976 gives the management responsibility for these rights-of-way to the Secretary of the Interior.

DATE: Comments by January 7, 1980.

ADDRESS: Send comments to: Director (650), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240. Comments will be available for public review in Room 5555 at the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Robert C. Bruce, 202-343-8735, or Bob Mollohan, 202-343-5537.

SUPPLEMENTARY INFORMATION: The principal author of this rulemaking is Robert E. Mollohan, Division of Rights-of-way and Project Review of the Bureau of Land Management, assisted by the Division of Legislation and Regulatory Management, Bureau of Land Management, and the Office of the Solicitor, Department of the Interior.

The Bureau of Land Management, in a coordinated joint effort with the Forest Service, invited public participation in developing regulations under title V of the Federal Land Policy and Management Act of 1976 by issuing a preproposed outline of procedures for granting rights-of-way on November 14, 1977, which invited written comments. Four public meetings were also held to obtain public input.

Title V of the Federal Land Policy and Management Act replaces most of the Bureau of Land Management's previous authority for granting rights-of-way, and provides broad discretionary power to the agency in developing current policies and procedures for carrying out that authority. This proposed rulemaking varies significantly from the previous regulations in that title V of the Federal Land Policy and Management Act combined and condensed various separate Acts dealing with specific types of rights-of-way. This combining promotes uniform right-of-way provisions for the majority of public and private users. In addition, title V of the Federal Land Policy and Management Act made its statutory provisions applicable to both the Bureau of Land Management and the Forest Service, encouraging the two agencies to jointly develop a common system for granting rights-of-way.

Joint agency staff teams developed an outline of suggested common right-of-way grant procedures. The outline was distributed on November 14, 1977, to user groups, States and other involved governmental agencies, and interested public and private groups. The Bureau of Land Management and the Forest Service recognize the efforts and appreciate the thoughtful comments of the many participants in this joint rulemaking process. This proposed rulemaking is addressed only to public lands administered by the Bureau of Land Management. The Forest Service has developed a separate, but similar set of regulations that apply to lands in the National Forest System.

The Bureau of Land Management, in addressing these comments, found it impractical to respond to each separate comment and instead, has addressed the more repetitive and significant comments as follows:

Comment: Several industry groups urged the development of separate regulations designed specifically for their particular needs.

Response: The Federal Land Policy and Management Act mandates that right-of-way grants be authorized on the basis of the needs and circumstances peculiar to each right-of-way, including location, ground to be occupied, duration and terms and conditions. If separate regulations were developed for different industry groups, the specific needs of each grant might not be complied with, but narrowly limited. To be fully satisfactory, the right-of-way granted would have to be adequate for the most demanding circumstance that might occur, and specialized regulations would defeat this purpose.

Separate regulations for classes of industries, rights-of-way or uses according to size are infeasible and would be arbitrary in terms of application requirements. The initial Outline of Proposed Procedures illustrated this problem. It mentioned all of the possible disclosure requirements that might be necessary under any circumstance. The comments requested less stringent requirements be implemented in the regulations.

In the past, Bureau of Land Management right-of-way regulations were highly detailed and contained much procedural guidance, mandatory terms, widths and durations. This was necessary to accommodate the many specific authorities that the Federal Land Policy and Management Act repealed. Because the Act is a broad, general authority, we have been able to substantially shorten and simplify the regulations. Where necessary, additional guidance will be provided to the field in the Bureau Manual. Manuals are written in relatively broad terms for systemwide guidance but are frequently supplemented at the State Offices to achieve consistency along with appropriate adaptation to local conditions.

The rulemaking also encourages applicants to contact local Bureau of Land Management Offices prior to applying for instructions and guidance.

Comment: Several States and the Federal Highway Administration pointed out that the Federal Land Policy and Management Act did not preclude grants for highway purposes under sections 107 and 317 of title 23 of the United States Code. They added that the grants made by the Department of Transportation under title 23 have satisfied their needs on national forest lands.

Response: The Forest Service plans to continue its current practice of consenting to appropriation of highway rights-of-way by the Federal Highway Administration. The Bureau of Land Management will continue to use its existing regulations (43 CFR 2821) at this time and will review the Forest Service approach for Federal Aid Highways.

Comment: Owners of private lands intermingled with public lands wanted a perpetual easement across public lands appurtenant to the private lands served.

Several cited situations where local statutes require permanent access prior to allowing subdivisions of private land. Others cited the need for permanent access to obtain mortgage loans.

Response: Access rights-of-way across public land to reach intermingled private lands posed a substantial problem for the authors of the regulations. While several objectives can be stated, specific details will have to be developed in the cost-share and reciprocal right-of-way regulations that will follow. The cost-share and reciprocal right-of-way programs are in effect where intermingled private lands are managed for long-term timber production primarily in the Pacific Northwest. However, intermingled

§ 2802.3-2 Technical and financial capability.

The applicant shall furnish evidence satisfactory to the authorized officer that the applicant has, or prior to commencement of construction shall have, the technical and financial capability to construct, operate, maintain and terminate the project for which authorization is requested.

§ 2802.3-3 Project description.

(a) The applicant shall furnish an explanation of how the project will interrelate with existing and future projects and other developments on the public lands.

(b) The project descripton shall be in sufficient detail to enable the authorized officer to determine:

(1) The technical and economic feasibility of the project;

(2) Its impact on the environment;

(3) Any benefits provided to the public;

(4) The safety of the proposal; and

(5) The specific public lands proposed to be occupied or used.

When required by the authorized officer, applicant shall also submit the following:

(i) A description of the proposed facility;

(ii) An estimated schedule for construction of all facilities together with anticipated manpower requirements for each stage of construction;

(iii) A description of the construction techniques to be used;

(iv) Total estimated construction costs; and

(v) A description of the applicant's alternative route considerations.

§ 2802.3-4 Environmental protection plan.

If the authorized officer determines that the issuance of the right-of-way authorization requires the preparation of an environmental statement, the applicant shall submit a plan for the protection and rehabilitation of the environment during construction, operation, maintenance and termination of the project.

§ 2802.3-5 Additional information.

The applicant shall furnish any other information and data required by the authorized officer to enable him/her to make a decision on the application.

§ 2802.3-6 Maps.

(a) The authorized officer may at his/her discretion require the applicant to file a map with the application. When the authorized officer determines not to require the filing of a map with the application, the application may be filed and processing may proceed. Where the application is accepted without a map, the applicant shall be notified that a map shall be required prior to the issuance of the grant or permit, or within 60 days of completion of construction, as determined by the authorized officer. When the authorization is for use of an existing road controlled by the United States, any map showing said road shall suffice. The requirements of paragraph (b) of this section shall not apply in this situation.

(b) Maps portraying linear rights-of-way, as a minimum, shall show the following data:

(1) The bearing and distance of the traverse line or the true centerline of the facility as constructed;

(2) At least one tie to a public land survey monument to either the beginning or ending point of the right-of-way. If a public land survey monument is not within a reasonable distance as determined by the authorized officer, the survey shall be tied to either a relatively permanent man-made structure or monument or some prominent natural feature. However, when the right-of-way crosses both public lands and lands other than public lands, each parcel of public land crossed by said right-of-way must be tied to a public land survey monument, or if the map shows a continuous survey from the beginning point to the ending point of the project regardless of land ownership, then only one corner tie at either the initial or terminal point is required;

(3) The exterior limits of the right-of-way and the width thereof;

(4) A north arrow;

(5) All subdivisions of each section or portion thereof crossed by the right-of-way, with the subdivisions, sections, townships, and ranges clearly and properly noted; and

(6) Scale of the map. The map scale shall be such that all of the required information shown thereon is legible.

(c) Maps portraying non-linear or site-type rights-of-way shall include the requirements of paragraph (b)(4), (5), and (6) of this section. In addition, the map shall show, as a minimum, the following data:

(1) The bearing and distance of each exterior sideline of the site; and

(2) At least one angle point of the survey shall be tied to a public land survey monument, as provided for in paragraph (b)(2) of this section.

(d) Any person, State or local government which has constructed public highways under authority of R.S. 2477 (43 U.S.C. 932, repealed October 12, 1976), shall file within 3 years of the effective date of these regulations a map showing the location of all such public highways constructed under R.S. 2477. Maps required pursuant to this paragraph shall, as a minimum, be a county highway map showing all county roads located on the public lands, a State highway map showing State highways located on public land, and in the case of a municipality, a street or road map showing the location of city streets or roads. An individual who has constructed a public road pursuant to R.S. 2477 shall, as a minimum, submit a United States Geological Survey Quadrangle showing the location of said road on public land.

§ 2802.4 Application processing.

(a) The authorized officer shall acknowledge, in writing, receipt of the application and initial cost reimbursement payment required by § 2803.1-1 of this title. An application may be denied if the authorized officer determines that:

(1) The proposed right-of-way or permit would be inconsistent with the purpose for which the public lands are managed;

(2) That the proposed right-of-way or permit would not be in the public interest;

(3) The applicant is not qualified;

(4) The right-of-way or permit would otherwise be inconsistent with the act or other applicable laws; or

(5) The applicant does not or cannot demonstrate that he/she has the technical or financial capacity.

(b) Upon receipt of the acknowledgement, the applicant may continue his or her occupancy of the public land pursuant to § 2802.1(d) of this title to continue to gather data necessary to perfect the application. However, if the applicant finds or the authorized officer determines that surface disturbing activities will occur in gathering the necessary data to perfect the application, the applicant shall file an application for a temporary use permit prior to entering into such activities on the public land.

(c) The authorized officer may require the applicant for a right-of-way grant to submit such additional information as he deems necessary for review of the application. Where the authorized officer determines that the information supplied by the applicant is incomplete or does not conform to the act or these regulations, the authorized officer shall either reject the application or notify the applicant of the continuing deficiency and afford the applicant an opportunity to file a correction. Where a deficiency notice has not been adequately complied with, the authorized officer may reject the application or notify the applicant of the continuing deficiency

Bureau of Land Management

43 CFR Part 2800

[Circular No. 2468]

Rights-of-Way, Principals and Procedures; Federal Land Policy and Management Act; Management of Rights-of-Way and Related Facilities on Public Lands and Reimbursement of Costs

AGENCY: Bureau of land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking establishes procedures for the management of all rights-of-way on public lands except pipelines for oil, natural gas and petroleum products; Federal Aid Highways; cost-share roads; and access to mining claims. Title V of the Federal Land Policy and Management Act of 1976 gives the management responsibility for these rights-of-way to the Secretary of the Interior.

EFFECTIVE DATE: July 31, 1980.

ADDRESS: Any recommendations or suggestions should be addressed to: Director (330), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Bob Mollohan (202) 343-5537.

SUPPLEMENTARY INFORMATION: The proposed rulemaking on Management of Rights-of-Way and Related Facilities on Public Lands and Reimbursement of Costs under the provisions of title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761), was published in the Federal Register on October 9, 1979 (44 FR 58106). The proposed rulemaking invited comments for 90 days ending on January 7, 1980. During the comment period and several days thereafter, a total of 73 comments were received. Thirty-two of the comments came from business sources, mostly utilities, fifteen from State and local governments, twelve from Federal agencies, six from local rural electric associations and two from individuals.

General Comments

Many of the comments wanted to know what action had been taken on the suggestions made on the notice of intent to propose rulemaking. The preamble to the proposed rulemaking contained a detailed discussion of the comments received on the notice of intent to propose rulemaking and the action taken on these comments. It would serve little purpose to discuss the comments again in this document.

Generally, the comments on the proposed rulemaking expressed the opinion that the Bureau of Land Management had made a real effort to adopt the points raised by those commenting on the procedures for granting rights-of-way outlined in the notice of intent. Several of the comments stated that they thought the proposed rulemaking was a good effort to meet users needs. Other comments were of the opinion that the proposed rulemaking needed extensive revision in order to provide users with an effective procedure for obtaining rights-of-way on public lands. The proposed rulemaking represented a conscious effort by the Bureau of Land Management to incorporate the changes recommended in the many comments received both in writing and during public hearings to provide a procedure that would be an effective tool both for users and for bureau personnel who issue the rights-of-way. Some of the suggested changes could not be accepted and every effort was made to adopt changes to the extent consistent with the law and regulations to provide the least burdensome rules possible.

One comment commended the efforts made in the proposed rulemaking to remove sexist terms, but recommended further efforts. While appreciating this comment, no further changes have been made in this regard.

In addition to the general comments, comments were received covering specific areas of the proposed rulemaking. The following segment of this preamble addresses those specific comments, setting forth only those sections on which comments were received.

Specific Comments

Objectives

A comment requested that section 102(a)(2) of the Federal Land Policy and Management Act of 1976 be repeated in the Objectives section of the final rulemaking. Even though this suggestion has not been adopted, the Objectives section makes reference to land use plans, which requires compliance with the provisions of 43 CFR Part 1601, the Bureau of Land Management's land use planning regulations. Further, the rulemaking requires compliance with existing Federal and State law, including the requirement to comply with the provisions of the Federal Land Policy and Management Act of 1976, the basic authority for the issuance of this rulemaking.

Another comment recommended that the Objectives section include a listing of the types of grants that could be made under this rulemaking. This suggestion has not been adopted because the type of grant that will be made as a result of an application for a right-of-way will be determined at the time of granting and the granting document will provide the terms of the grant.

A final comment on this section wanted a specific reference to the environmental analysis process to be included in the rulemaking. This general section of the final rulemaking has not been amended to include a specific reference to the environmental analysis process. Other sections of the rulemaking, § 2802.3-4, make specific provision for carrying out the environmental analysis process.

Authority

A comment requested that additional authority be listed for the issuance of rights-of-way. This rulemaking is concerned with the right-of-way authority granted by title V of the Federal Land Policy and Management Act. Other authority used for the granting of rights-of-way is covered in other parts of Title 43 of the Code of Federal Regulations. Therefore, no change has been made in the authority section of the final rulemaking.

Definitions

Several comments were directed at the various paragraphs of this section. A couple of comments recommended that the definition of the term "authorized officer" be changed. The comments argued that the definition was not specific enough and should list the qualifications of the authorized officer. The term "authorized officer" has not been changed. The term "authorized officer", as used in this section, refers in most cases to the District Manager who has management responsibility over the lands covered by a right-of-way application. These individuals are land managers with varied backgrounds. They do not work alone, but have in their district offices trained personnel who can give them the advice they need to use as the basis of their decision on a right-of-way application.

A few comments suggested amending the term "right-of-way grant" to include the type of right or interest in the lands that would be granted by the grant. The comments specifically wanted to include in the definition such terms as "easement", "lease", "permit", etc., and to define these terms in the definition section. As discussed above, the

privileges to United States citizens, its application shall be denied. A right-of-way or temporary use permit shall not be granted to a minor, but either may be granted to legal guardians or trustees of minors in their behalf.

(b) An application by a private corporation shall be accompanied by a copy of its charter or articles of incorporation, duly certified by the proper State official where the corporation was organized, and a copy of its bylaws, duly certified by the secretary of the corporation.

(c) A corporation, other than a private corporation, shall file a copy of the law under which it was formed and provide proof of organization under the same, and a copy of its bylaws, duly certified by the secretary of the corporation.

(d) When a corporation is doing business in a State other than that in which it is incorporated, it shall submit a certificate from the Secretary of State or other proper official of that State indicating that it has complied with the laws of the State governing foreign corporations to the extent required to entitle the company to operate in such State, and that the corporation is in good standing under the laws of that State.

(e) A copy of the resolution by the board of directors of the corporation or other documents authorizing the filing of the application shall also be filed.

(f) If the corporation has previously filed with the Department the papers required by this subpart, and there have not been any amendments or revisions of the corporation's charter, articles of incorporation or bylaws, the requirements of this subpart may be met in subsequent applications, by specific reference to the previous filing by date, place and case number.

(g) If the applicant is a partnership, association or other unincorporated entity, the application shall be accompanied by a certified copy of the articles of association, partnership agreement, or other similar document creating the entity, if any. The application shall be signed by each partner or member of the entity, unless the entity shows evidence in the form of a resolution or similar document that one member has been authorized to sign in behalf of the others. In the absence of such resolution each partner shall furnish the evidence of qualification which would be required if the partner or member were applying separately.

(h) If the applicant is a State or local government, or agency or instrumentality thereof, the application shall be accompanied by a statement to that effect and a copy of the law, resolution, order, or other authorization under which the application is made.

(i) Each application by a partnership, corporation, association or other business entity shall, upon the request of the authorized officer, disclose the identity of the participants in the entity and shall include where applicable:

(1) The name, address and citizenship of each participant (partner, associate or other);

(2) Where the applicant is a corporation: the name, address, and citizenship of each shareholder owning 3 percent or more of each class of shares, together with the number and percentage of any class of voting shares of the entity which each shareholder is authorized to vote; and

(3) The name, address, and citizenship of each affiliate of the entity. Where an affiliate is controlled by the entity, the application shall disclose the number of shares and the percentage of each class of voting stock of that affiliate owned, directly or indirectly, by the entity. If an affiliate controls the entity, the number of shares and the percentage of each class of voting stock of the entity owned, directly or indirectly, by the affiliate shall be included.

§ 2802.3-2 Technical and financial capability.

The applicant shall furnish evidence satisfactory to the authorized officer that the applicant has, or prior to commencement of construction shall have, the technical and financial capability to construct, operate, maintain and terminate the project for which authorization is requested.

§ 2802.3-3 Project description.

(a) The applicant shall furnish an explanation of how the project will interrelate with existing and future projects and other developments on the public lands.

(b) The project description shall be in sufficient detail to enable the authorized officer to determine:

(1) Its impact on the environment;

(2) Any benefits provided to the public;

(3) The safety of the proposal; and

(4) The specific public lands proposed to be occupied or used.

(c) When required by the authorized officer, the applicant shall also submit the following:

(1) A description of the proposed facility;

(2) An estimated schedule for construction of all facilities together with anticipated manpower requirements for each stage of construction;

(3) A description of the construction techniques to be used; and

(4) A description of the applicant's alternative route considerations.

§ 2802.3-4 Environmental protection plan.

If the authorized officer determines that the issuance of the right-of-way authorization requires the preparation of an environmental statement, the applicant shall submit a plan for the protection and rehabilitation of the environment during construction, operation, maintenance and termination of the project.

§ 2802.3-5 Additional information.

The applicant shall furnish any other information and data required by the authorized officer to enable him/her to make a decision on the application.

§ 2802.3-6 Maps.

(a) The authorized officer may at his/her discretion require the applicant to file a map with the application. When the authorized officer determines not to require a detailed map prepared in accordance with paragraph (b) of this section, the applicant shall attach to the application a map such as a United States Geological Survey Quadrangle map or aerial photograph showing the approximate location of the facility and processing may proceed. Where the application is accepted without a detailed survey map, the applicant shall be notified that a map pursuant to paragraph (b) of this section shall be required prior to the issuance of the grant or permit, or within 60 days of completion of construction, as determined by the authorized officer, except that the authorized officer may waive all or part of the requirements of paragraph (b) of this section for maps for temporary use permits. When the authorization is for use of an existing road controlled by the United States, any map showing said road shall suffice and the requirements of paragraph (b) of this section shall not apply in this situation.

(b) Maps or aerial photographs portraying linear rights-of-way, as a minimum, shall show the following data:

(1) The bearing and distance of the traverse line or the true centerline of the facility as constructed;

(2) At least one tie to a public land survey monument to either the beginning or ending point of the right-of-way. If a public land survey monument is not within a reasonable distance as determined by the authorized officer, the survey shall be tied to either a relatively permanent man-made structure or monument or some prominent natural feature. However, when the right-of-way crosses both public lands and lands other than public lands, each parcel of

public land crossed by said right-of-way must be tied to a public land survey monument, or if the map shows a continuous survey from the beginning point to the ending point of the project regardless of land ownership, then only one corner tie at either the initial or terminal point is required;

(3) The exterior limits of the right-of-way and the width thereof;

(4) A north arrow;

(5) All subdivisions of each section or portion thereof crossed by the right-of-way, with the subdivisions, sections, townships, and ranges clearly and properly noted; and

(6) Scale of the map. The map scale shall be such that all of the required information shown thereon is legible.

(c) Maps portraying non-linear or site-type rights-of-way shall include the requirements of paragraphs (b)(4), (5), and (6) of this section. In addition, the map shall show, as a minimum, the following data:

(1) The bearing and distance of each exterior sideline of the site; and

(2) At least one angle point of the survey shall be tied to a public land survey monument, as provided for in paragraph (b)(2) of this section.

(d) In order to facilitate proper management of the public lands and to assist the authorized officer in developing a sound transportation plan, any person or State or local government which has constructed public highways under the authority of R.S. 2477 (43 U.S.C. 932, repealed October 21, 1976), is provided the opportunity to file within 3 years of the effective date of these regulations a map showing the location of all such public highways constructed under R.S. 2477. Maps filed pursuant to this paragraph should, as a minimum, be a county highway map showing all county roads located on the public lands, a State highway map showing State highways located on public land, and in the case of a municipality, a street or road map showing the location of city streets or roads. An individual who has constructed a public road pursuant to R.S. 2477 should, as a minimum, submit a United States Geological Survey Quadrangle showing the location of said road on public land. The submission of such maps depiciting the location of alleged R.S. 2477 highways shall not be conclusive evidence of their existence. Similarly, failure to depict such roads shall not preclude a later finding as to their existence.

§ 2802.4 Application processing.

(a) The authorized officer shall acknowledge, in writing, receipt of the application and initial cost reimbursement payment required by § 2803.1-1 of this title. An application may be denied if the authorized officer determines that:

(1) The proposed right-of-way or permit would be inconsistent with the purpose for which the public lands are managed;

(2) That the proposed right-of-way or permit would not be in the public interest;

(3) The applicant is not qualified;

(4) The right-of-way or permit would otherwise be inconsistent with the act or other applicable laws; or

(5) The applicant does not or cannot demonstrate that he/she has the technical or financial capacity.

(b) Upon receipt of the acknowledgement, the applicant may continue his or her occupancy of the public land pursuant to § 2802.1(d) of this title to continue to gather data necessary to perfect the application. However, if the applicant finds or the authorized officer determines that surface disturbing activities will occur in gathering the necessary data to perfect the application, the applicant shall file an application for a temporary use permit prior to entering into such activities on the public land.

(c) The authorized officer may require the applicant for a right-of-way grant to submit such additional information as he deems necessary for review of the application. All requests for additional information shall be in writing. Where the authorized officer determines that the information supplied by the applicant is incomplete or does not conform to the act or these regulations, the authorized officer shall notify the applicant of these deficiencies and afford the applicant an opportunity to file a correction. Where a deficiency notice has not been adequately complied with, the authorized officer may reject the application or notify the applicant of the continuing deficiency and afford the applicant an opportunity to file a correction.

(d) Prior to issuing a right-of-way grant or temporary use permit, the authorized officer shall:

(1) Complete an environmental analysis in accordance with the National Environmental Policy Act of 1969;

(2) Determine compliance of the applicant's proposed plans with applicable Federal and State laws;

(3) Consult with all other Federal, State, and local agencies having an interest, as appropriate; and

(4) Take any other action necessary to fully evaluate and make a decision to approve or deny the application and prescribe suitable terms and conditions for the grant or permit.

(e) The authorized officer may hold public meetings on an application for a right-of-way grant or temporary use permit if he determines that such meetings are appropriate and that sufficient public interest exists to warrant the time and expense of such meetings. Notice of public meetings shall be published in the Federal Register or in local newspapers or in both.

(f) A right-of-way grant or temporary use permit need not conform to the applicant's proposal, but may contain such modifications, terms, stipulations or conditions, including changes in route or site location on public lands, as the authorized officer determines to be appropriate.

(g) No right-of-way grant or temporary use permit shall be in effect until the applicant has accepted, in writing, the terms and conditions of the grant or permit. Written acceptance shall constitute an agreement between the applicant and the United States that, in consideration of the right to use public lands, the applicant shall comply with all terms and conditions contained in the authorization and the provisions of applicable laws and regulations.

(h) The authorized officer may place a provision in a right-of-way grant requiring that no construction on or use of the right-of-way shall occur until detailed construction or use plans have been submitted to the authorized officer for approval and one or more notices to proceed with that construction or use have been issued by the authorized officer. This requirement may be imposed for all or any part of the right-of-way.

§ 2802.5 Special application procedures.

An applicant filing for a right-of-way within 4 years from the effective date of this subpart for an unauthorized right-of-way that existed on public land prior to October 21, 1976, is not:

(a) Required to reimburse the United States for costs incurred for processing an application and for the preparation of reports and statements pursuant to the National Environmental Policy Act of 1969 (see § 2803.1-1(a)(1)) which are above the schedule shown in § 2803.1-1(a)(3)(i) of this title.

(b) Required to reimburse the United States for costs incurred incident to a right-of-way for monitoring (the construction, operation, maintenance and termination) of authorized facilities as required in § 2803.1-1(b) of this title.

(c) Required to pay rental fees for the period of unauthorized land use.

DEPARTMENT OF THE INTERIOR

43 CFR Part 2800

Rights-of-Way, Principles and Procedures; Amendment to Rights-of-Way Regulations

AGENCY: Bureau of Land Management, Interior.

ACTION: Proposed rulemaking.

SUMMARY: This proposed rulemaking would eliminate burdensome, outdated and unneeded provisions in the existing rights-of-way regulations for right-of-way grants issued under the provisions of title V of the Federal Land Policy and Management Act of 1976.

DATE: Comments by September 21, 1981.

ADDRESS: Comments should be sent to: Director (650), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240. Comments will be available for public review in Room 5555 of the above address during regular working hours (7:45 a.m. to 4:15 p.m.) on regular working days.

FOR FURTHER INFORMATION CONTACT: John Hafterson (202) 343-5537; or Robert C. Bruce (202) 343-8735

SUPPLEMENTARY INFORMATION: The operation of the rights-of-way regulations since they became effective some 15 months ago has revealed several provisions that could be eliminated, thereby making the regulations easier to understand and fulfill by both the public and Bureau personnel. These changes will also reduce the burden placed on the public by the regulations.

The first change in the regulations is a complete revision of the section on application content, § 2802.3. The information that an applicant must furnish the Bureau of Land Management in order to obtain a right-of-way grant has been reduced. The amendment would allow the use of a consolidated Federal right-of-way application form that is under development. The new consolidated form is being developed by the Department of the Interior, the Department of Transportation and the Department of Agriculture with input from other interested agencies. This new consolidated form should help the affected public by giving them one form for use in connection with any right-of-way grant from any agency of the Federal government. Further, the consolidated form will reduce the requirements for information to a minimum. The public was requested to comment on the proposed form by publication in the Federal Register of March 12, 1981 (46 FR 16342). The public comments are being reviewed and a revised form will be submitted to the Office of Management and Budget as required by the Paperwork Reduction Act of 1980 (Pub. L. 96-511). The use of this form will not be required until it has been approved by the Office of Management and Budget.

Other changes in § 2802.3 include the elimination of the citizenship requirement, permitting applicants other than individuals to attest to their qualifications to do business rather than having to prove it with documentation, and a general reduction in the amount of information that an applicant must furnish with an application.

Sections 2802.3-2, 2802.3-3 and 2802.3-6 of the existing regulations would be revised to delete the present requirements and to reduce requirements for the furnishing of technical and financial capability and a description of the projects and needed maps.

Section 2802.3-4 has been deleted from the regulations as being no longer needed. The requirement for an environmental plan is not an appropriate part of the application system. If an environmental plan is needed from an applicant, it would be called for much later in the process and the need for the plan would be worked out with the applicant.

Section 2802.3-5 would be eliminated because it is redundant and the authority to request additional information appears in § 2802.4.

Subpart 2805 would be deleted in its entirety and would be replaced by a new § 2802.5-2 which requires an applicant to work with the Department of Energy on any required wheeling agreement. In order to reduce any possible delay in the issuance of a right-of-way grant because of difficulties in arriving at a wheeling agreement, the amendment would permit the right-of-way grant to be issued and would allow a year for completion of the wheeling agreement.

The principal author of this proposed rulemaking is John Hafterson, Division of Rights-of-Way and Project Review, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that the publication of this document is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement is required pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 96-354).

PART 2800—RIGHTS-OF-WAY, PRINCIPLES AND PROCEDURES

Under the authority of title V of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716-1771), it is proposed to amend Part 2800, Group 2800, Subchapter B, Chapter II, Title 43 of the Code of Federal Regulations as set forth below:

§§ 2802.3-1-2802.3-6 [Removed]

1. Sections 2801.3-1, 2802.3-2, 2802.3-3, 2802.3-4, 2802.3-5 and 2802.3-6 are removed in their entirety and § 2802.3 is revised as follows:

§ 2802.3 Application content.

Applications for right-of-way grants or temporary use permits shall be filed on a form approved by the Director. The application form shall contain instructions for the completion of the form and shall require the following information:

(a) The name and address of the applicant and the applicant's authorized agent, if appropriate;

(b) A description of the applicant's proposal;

(c) A map and description of the location of the applicant's proposal;

(d) A statement of the applicant's compliance with the requirements of State and local governments;

(e) A statement of the applicant's technical and financial capability to construct, operate, maintain and terminate the proposal;

(f) A description of the alternative routes and modes considered when developing the proposal;

(g) A listing of other similar applications or grants the applicant has submitted or holds;

(h) A statement of need and economic feasibility of the proposal;

(i) A statement of the environmental, social and economic effects of the proposal; and

(j) For applicants other than individuals, a statement attesting to their authorization to conduct business in the area where the proposal is located.

2. Add a new § 2802.6 as follows:

§ 2802.6 Special requirement for applicants for electric power transmission lines of 66 KV or above.

The applicant for a right-of-way grant for a power project having a voltage of 66 kilovolts or more shall execute an

agreement with the Department of Energy agreeing to the wheeling of power from any facility having a voltage of 66 kilovolts or more unless the Department of Energy determines that a wheeling agreement is not necessary. The agreement shall be excluded within 1 year of the issuance of the right-of-way grant. Failure to execute a required wheeling agreement may result in the suspension or termination of the right-of-way grant.

Subpart 2805—Applicants for Electric Power Transmission Lines of 66 KV or Above [Removed]

3. Subpart 2805—Applications for Electric Power Transmission Lines of 66 KV or Above—is removed in its entirety.

David G. Russell,

Deputy Assistant Secretary of the Interior.

April 29, 1981.

BILLING CODE 4310-84-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Part 2800

[Circular No. 2500]

Rights-of-Way, Principles and Procedures; Amendment

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will eliminate burdensome, outdated and unneeded provisions in the existing right-of-way regulations for right-of-way grant issued under the provisions of title V of the Federal Land Policy and Management Act of 1976. This amendment came about as a result of the efforts of the Administration and the Secretary of the Interior to streamline existing regulations.

EFFECTIVE DATE: April 22, 1982.

ADDRESS: Any inquiries or suggestions should be sent to: Director (330), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John Hafterson, (202) 653-8842 or Robert C. Bruce, (202) 343-8735.

SUPPLEMENTARY INFORMATION: The proposed rulemaking amending the regulations on Rights-of-Way, Principles and Procedures, was published in the Federal Register on August 5, 1981 (46 FR 39968), with a 45-day comment period ending on September 21, 1981. Forty-two comments were received on this proposed rulemaking and the proposed rulemaking on Rights-of-Way under the Mineral Leasing Act which was published the same day. Most of those making comments combined their comments and for the purposes of these two rulemakings, we have combined all of the comments and considered them as applying to both rulemakings. The comments came from the following sources: 22 from industry, 9 from Federal agencies, 8 from industry associations, 1 from an association of State governments and 1 from an individual.

The comments were unanimous in their praise of the effort of the Department of the Interior in reducing the impact of the right-of-way regulations on the using public. As one comment pointed out, the Department of the Interior deserves praise for its efforts to reduce the paperwork burden imposed on the public by its regulations. The comments noted that the rights-of-way regulations were developed in close consultation with the affected public, but that these changes were an improvement to that effort. In addition to these general comments, comments were made on specific sections of the proposed rulemaking and will be discussed in connection with each of the sections.

Nearly all of the comments pointed out the numbering area contained in section 1 of the proposed rulemaking. The number "2801.3-1" has been corrected in the final rulemaking to "2802.3-1" as the title to that change clearly shows what was intended.

Nearly all of the comments praised the decision to remove the citizenship requirement that had been made a part of the regulations by the Secretary of the Interior in the exercise of his discretionary authority. One comment did object to its removal, stating that removal of the provisions will operate to encourage foreign competition for limited domestic resources. The citizenship requirement is deleted from the existing regulations by the final rulemaking.

The other deletions relating to applicant qualifications and disclosure were also favored by the majority of those commenting. One comment noted that the stockholder disclosure requirement was required by section 501 of the Federal Land Policy and Management Act and recommended that the requirement for stockholder disclosure not be removed from the regulations. The final rulemaking removes the stockholder and other disclosure requirements from the regulations, but these requirements are continued in the new application form. In administering these requirements, the Bureau of Land Management will, as a practical matter, require disclosure of the information only when it is needed to carry out its responsibility to manage the public lands and preserve them for the use of the public.

One comment objected strongly to the three percent stockholder requirement in the regulations and suggested that it be dropped entirely. Since this requirement is imposed by the Federal Land Policy and Management Act, the Bureau of Land Management has the authority to require a corporate entity to reveal the information if it is needed to make a determination as to whether a right-of-way should be granted, issued or renewed. Any change in this authority would have to be made by the Congress.

One comment favored the deletion of the requirement on technical and financial capability of a right-of-way applicant and recommended that it be deleted from the new application requirement section. The view was expressed that this requirement was not needed because the bonds required of an applicant protected the United States from the failure of an applicant to fulfill the requirements of the right-of-way grant. The final rulemaking deletes the technical and financial capability requirement from § 2803.3-2 but places a similar requirement in the § 2803.2-3, the new application content section. Section 504(j) of the Federal Land Policy and Management Act requires a finding that the applicant is financially and technically qualified to construct the project as a prerequisite to granting the right-of-way. The Bureau of Land Management, in administering this requirement, will accept a statement by the applicant that it is financially and technically qualified to go forward with the project, except in those instances where previous experience has shown the applicant lacks adequate financial or technical capacity to carry out its obligations under a grant. Further, the bonds required of an applicant are for the purpose of protecting the public lands from damage that might occur as a result of the actions of an applicant, not for the purpose of assuring the applicant's financial and technical qualifications.

The comments favored the change made by the proposed rulemaking and carried out in the final rulemaking that removes the section on project description and replaces it with a short requirement in the § 2802.3. The new requirement is greatly streamlined and imposes a less burdensome requirement on the public.

A number of comments expressed their views on the deletion of the environmental protection plan requirements contained in § 3802.3-4 of the existing regulations and which is deleted by the proposed rulemaking. Most of the comments favored the change, but one of the comments expressed the view that a decision on a right-of-way should not be made without the benefit of an environmental assessment. We concur in the need for analyzing the impact of a right-of-way before the right-of-way grant is issued. However, we do not believe that the plan required by section 504(d) of the Federal Land Policy and Management Act should be submitted with the application for a right-of-way. To require an applicant to prepare a protection plan prior to completion of the environmental evaluation is both unfair and wasteful. After the environmental assessment has been completed and a decision has been made that the right-of-way can be granted, then the applicant can be requested to submit the protection plan.

If the decision is made that the right-of-way should not be granted, the applicant has not borne the cost of preparing a protection plan. The final rulemaking has not made any change in the amendment made by the proposed rulemaking on this subject, but does add a new paragraph (h) to § 2802.4 that authorizes the authorized officer to place a provision concerning a protection plan in the right-of-way grant to provide the public lands adequate protection and fulfill the requirements of the Federal Land Policy and Management Act.

All of the comments supported the deletion of § 2802.3–5, the authority for the authorized officer to obtain additional information for use in making a decision on the application. If additional information is needed by the authorized officer to allow a decision on the application, it can be obtained under § 2802.4. The final rulemaking makes no change in the provisions of the proposed rulemaking on this point.

The comments on maps made by the proposed rulemaking raised a number of issues. Most of the comments supported the deletion of the detailed map requirements in § 2802.3–6 of the existing regulations, with a few questioning the need for information required by the new map provision that the proposed rulemaking adds to § 2802.3. The final rulemaking contains in § 2802.3(a)(3) a new, simplified, minimum map requirement that will furnish sufficient information to allow the authorized officer to determine the general location of the project and make a general evaluation of it. If more detailed maps are needed, they can be requested under other provisions of the existing regulations. As a result of a couple of comments that objected to the deletion of the mapping requirement relating to roads established under the provisions of section 2477 of the Revised Statutes contained in § 2802.3–6(d), the final rulemaking has added a new paragraph (b) to § 2802.5 of the regulations that contains the requirement relating to R.S. 2477 roads. This was done because the section on R.S. 2477 roads provides a convenient, but optional means, to resolve road status questions. The furnishing of the maps on the public roads remains at the option of the road owner.

A number of the comments on the application content requirements contained in the proposed rulemaking were concerned about the use of the consolidated application form that was developed primarily for use in Alaska. We are aware of these concerns and are designing instructions to accompany the consolidated form that will not require the completion of application items in excess of those needed to complete action on the application under consideration. Therefore, the Bureau of Land Management will be able to use the consolidated form that was published in the Federal Register on March 12, 1981 (46 FR 16342), for all rights-of-way.

All of the comments expressed agreement with the proposed reduction in the requirements for information to be included in applications. Most of the comments, however, recommended further changes in the requirements of the proposed rulemaking. After careful review of the comments and a thorough study of the requirements contained in the proposed rulemaking, the final rulemaking has been changed further. The requirements have been divided into two categories in the final rulemaking. The items that are required to be submitted with the application have been reduced to five, with the additional items that were part of the proposed rulemaking being listed as information that the applicant may submit to be of assistance to the authorized officer. There is no requirement that any of the information in paragraph (b) be submitted with the application.

There was considerable concern expressed in the comments about the provision requiring a statement of compliance with the standards of State governments. This requirement has been removed by the final rulemaking because it is not needed at the time the application is filed. However, in compliance with the provisions of section 505 of the Federal Land Policy and Management Act, § 2802.4 requires the authorized officer to require compliance with applicable State standards when granting the right-of-way. Section 2802.4 remains in the regulations and will be followed in the processing of a right-of-way grant.

Virtually all of the comments supported the change in the wheeling provisions made by the proposed rulemaking, but went on to suggest further changes or elimination of any reference to wheeling in the final rulemaking. After careful review of the wheeling provision and the comments, the final rulemaking deletes § 2802.6 in its entirety, along with Subpart 2805 which the proposed rulemaking deleted. The wheeling requirements are left to the Department of Energy, where the responsibility lies, as provided in Title II the Public Utility and Regulatory Policies Act of 1978 (16 U.S.C. 824j).

The principal author of this final rulemaking is John Hafterson, Division of Rights-of-Way and Project Review, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 96–354).

The information collection requirements contained in 43 CFR Part 2800 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004–0060 and 1004–0107.

Under the authority of title V of the Federal Land Policy and Management Act of 1975 (43 U.S.C. 1761–1771), Part 2800, Group 2800, Subchapter B, Chapter II of Title 43 of the Code of Federal Regulations is amended as set forth below.

Garrey E. Carruthers,
Assistant Secretary of the Interior
December 4, 1981.

PART 2800—RIGHTS-OF-WAYS, PRINCIPLES AND PROCEDURES

1. Group 2800 is amended by adding the following note to the beginning of the Table of Contents:

Group 2800—Use; Rights-of-Way

Note.—The information collection requirements contained in Parts 2800 and 2880 of Group 2800 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance numbers 1004–0060 and 1004–0107. The information is being collected to allow the authorized officer to determine if the applicant is qualified to hold a right-of-way grant, to determine if the issuance of a grant is in the public interest and to make other land management decisions. This information will be used in making those determinations. The obligation to respond is required to obtain a benefit.

§§ 2802.3–1—2802.3–6 [Removed]

2. Sections 2802.3–1, 2802.3–2, 2802.3–3, 2802.3–4, 2802.3–5 and 2802.3–6 are removed in their entirety and § 2802.3 is revised as follows:

§ 2802.3 Application content.

(a) Applications for right-of-way grants or temporary use permits shall be filed on a form approved by the Director. The application form shall contain instructions for the completion of the form and shall require the following information:

(1) The name and address of the applicant and the applicant's authorized agent, if appropriate;

(2) A description of the applicant's proposal;

(3) A map, USGS quadrangle, aerial photo or equivalent, showing the approximate location of the proposed right-of-way and facilities on public lands and existing improvements adjacent to the proposal, shall be attached to the application. Only the existing adjacent improvements which the proposal may directly affect need be shown on the map;

(4) A statement of the applicant's technical and financial capability to construct, operate, maintain and terminate the proposal;

(5) Certification by the applicant that he/she is of legal age, authorized to do business in the State and that the information submitted is correct to the best of the applicant's knowledge.

(b) The applicant may submit additional information to assist the authorized officer in processing the application. Such information may include, but is not limited to, the following:

(1) Federal or State approvals required for the proposal;

(2) A description of the alternative route(s) and mode(s) considered by the applicant when developing the proposal;

(3) Copies of or reference to similiar applications or grants the applicant has submitted or holds;

(4) A statement of need and economic feasibility or the proposal;

(5) A statement of the environmental, social and economic effects of the proposal.

§ 2802.4 [Amended]

3. Section 2802.4 is amended by revising paragraph (h) to read:

• • • • •

(h) The authorized officer may include in his/her decision to issue a grant a provision that shall be included in a right-of-way grant requiring that no construction on or use of the right-of-way shall occur until a detailed construction, operation, rehabilitation and environmental protection plan has been submitted to and approved by the authorized officer. This requirement may be imposed for all or any part of the right-of-way.

§ 2802.5 [Amended]

4. Section 2802.5 is amended by:

(a) Inserting at the beginning of the first paragraph of the section the figure "(a)";

(b) Redesignating existing paragraphs (a), (b) and (c) as subparagraphs (1), (2) and (3); and

(c) Adding a new paragraph (b) to read:

• • • • •

(b) In order to facilitate management of the public lands, any person or State or local government which has constructed public highways under the authority of R.S. 2477 (43 U.S.C. 932, repealed October 21, 1976) may file a map showing the location of such public highways with the authorized officer. Maps filed under this paragraph shall be in sufficient detail to show the location of the R.S. 2477 highway(s) on public lands in relation to State or county highway(s) or road(s) in the vicinity. The submission of such maps showing the location of R.S. 2477 highway(s) on public lands shall not be conclusive evidence as to their existence. Similiarly, a failure to show the location of R.S. 2477 highway(s) on any map shall not preclude a later finding as to their existence.

[Circular No. 2501]

Amendment to the Rights-of-Way Under the Mineral Leasing Act Regulations

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will eliminate burdensome, outdated and unneeded provisions in the existing regulations for oil and gas right-of-way grants under the Mineral Leasing Act.

EFFECTIVE DATE: April 22, 1982.

ADDRESS: Inquiries or suggestions should be addressed to: Director (330), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John Hafterson, (202) 653-8842 or Robert C. Bruce, (202) 343-8735.

SUPPLEMENTARY INFORMATION: The proposed rulemaking amending the regulations on Rights-of-Way Under the Mineral Leasing Act was published in the Federal Register on August 5, 1981 (46 FR 39964), with a 45-day comment period ending on September 21, 1981. Forty-two comments were received on this proposed rulemaking and the proposed rulemaking on Rights-of-Way, Procedures and Principles, which was published the same date. Most of those making comments combined their comments and for the purposes of these two rulemakings, we have combined all of the comments and considered them as applying to both rulemakings. The comments came from the following sources: 22 from industry, 9 from Federal agencies, 8 from industry associations, 1 from an association of State governments and 1 from an individual.

The comments were unanimous in their praise of the effort of the Department of the Interior in reducing the impact of the right-of-way regulations on the affected public. As one comment pointed out, the Department of the Interior deserves praise for its efforts to reduce the paperwork burden imposed on the public by its regulations. The comments noted that the right-of-way regulations had been developed in close consultation with the affected public, but that these changes were an improvement to that effort. In addition to these general comments, comments were made on specific sections of the proposed rulemaking and will be discussed in connection with each of the sections.

The comments supported the change in the proposed rulemaking that is continued in the final rulemaking that allows the filing of a right-of-way application in any office of the Bureau of Land Management having jurisdiction over the lands and not just at a State Office, as is now required. This change will save time for the using public.

The comments praised the Department of the Interior for the streamlining of the application process and the reduction in the amount of information required of an applicant to an absolute minimum. The comments did make some suggestions for further reductions in the information required of an applicant and these have resulted in a further change in the final rulemaking that has reduced still further the required information, with the applicant being given the opportunity to submit additional information, if it is desired, that might be helpful to the authorized officer in reaching a decision on the right-of-way application. One significant change in the required information is a more specific paragraph on the maps that are to be submitted with the application. The information called for is a bare minimum and should be easily available to all applicants.

OFFICE OF THE SOLICITOR
WASHINGTON, D.C. 20240

APR 28 1980

Honorable James W. Moorman
Assistant Attorney General
Land and Natural Resources Division
Department of Justice
Washington, D.C. 20530

Re: Standards to be applied in determining whether highways have been established across public lands under the repealed statute R.S. 2477 (43 U.S.C. § 932).

Dear Mr. Moorman:

I. Introduction

This is in response to your letter of March 12, 1980. The statute in question, R.S. 2477 (43 U.S.C. § 932), was originally section 8 of the Act of July 26, 1866 (14 Stat. 253). It was repealed in 1976 by section 706(a) of the Federal Land Policy and Management Act. Prior to its repeal, it provided in its entirety as follows:

> The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

Because of the repeal, we are only concerned with grants of rights-of-ways perfected prior to October 21, 1976, the date of the enactment of FLPMA.1/

As you are probably aware, R.S. 2477 has been the subject of inconsistent state statutes and state court decisions, and a handful of inconsistent federal court decisions, during its 110-year existence.2/ Even if the state interpretations were fully consistent with each other, they would not necessarily control, especially where, as here, almost all of the reported state court decisions involved competing rights of third parties and the United States was not a party to them. The analysis in the various federal

1/ A valid R.S. 2477 highway right-of-way is a valid existing right which is protected by FLPMA's sections 701(a) (43 U.S.C. § 1701 note), and 509(a) (43 U.S.C. § 1769(a)).

2/ The legislative history is silent as to the meaning of this section of the 1866 statute. See generally The Congressional Globe, Vol. 36, 39th Cong., 1st Sess. (1866).

DER/Genl.

cases involving R.S. 2477 also are not only inconsistent with each other, but none of them definitively come to grips with the precise issue we now face: Exactly what was offered and to whom by Congress in its enactment of R.S. 2477, and how were such rights-of-way to be perfected?

In the face of this tangled history,3/ we outline below what we believe to be the proper interpretation of R.S. 2477. Our interpretation comports closely with its language which, because of the absence of legislative history, is especially appropriate. Our view is also consistent with many of the reported decisions. It has the added virtue of avoiding what would otherwise be a serious conflict between highway rights-of-way established under R.S. 2477 and the meaning of the term "roadless" in section 603 of FLPMA, which deals with the Bureau of Land Management (BLM) wilderness review responsibilities.

3/ A similar situation existed in the dispute over the ownership of the submerged land off the coast of California. In United States v. California 332 U.S. 19 (1947), the state argued that the United States was barred from asserting its title to the area because of the prior inconsistent positions taken by its agents over the years. The Supreme Court refuted this contention, stating in part (332 U.S. at 39-40):

> As a matter of fact, the record plainly demonstrates that until the California oil issue began to be pressed in the thirties, neither the states nor the Government has had reason to focus attention on the question of which of them owned or had paramount rights in or power over the three-mile belt. And even assuming that Government agencies have been negligent in failing to recognize or assert the claims of the Government at an earlier date, the great interests of the Government in this ocean area are not to be forfeited as a result. The Government, which holds its interests here as elsewhere in trust for all the people, is not to be deprived of those interests by the ordinary court rules designed particularly for private disputes over individually owned pieces of property; and officers who have no authority at all to dispose of Government property cannot by their conduct cause the Government to lose its valuable rights by their acquiescence, laches, or failure to act. (Citations omitted, emphasis added.)

II. Does R.S. 2477 Apply to Highways Constructed After 1866?

A threshold issue here is whether the statute sought only to validate highways previously constructed in trespass, or to apply prospectively as well. This Department has always regarded R.S. 2477 as applying prospectively to highways constructed after 1866. In United States v. Dunn, 478 F.2d 443, 445, note 2 (9th Cir. 1973), however, the court of appeals held that the Act was designed only to cure the trespass of those persons who had already (prior to 1866) "encroached on the public domain without authorization." The court said R.S. 2477 was "not intended to grant rights, but instead to give legitimacy to an existing status otherwise indefinable." The Ninth Circuit relied on Supreme Court decisions in Jennison v. Kirk, 98 U.S. 453, 459-61 (1878), and Central Pacific Ry. Co. v. Alameda County, 28 U.S. 463 (1931).

Jennsion concerned section 9 of the 1866 Act, R.S. 2339, which — besides confirming and protecting the water rights of those who had perfected or accrued water rights on the public domain under local custom and laws — held liable for damages any person who, in constructing a ditch or canal, impaired the possession of any settler on the public domain. This section immediately followed section 8 of that Act (R.S. 2477) with which we are here concerned. The dispute in that case concerned two competing miners, the second of which (the plaintiff) had constructed a ditch for hydraulic mining which had crossed, and interfered with the first miner's working of, his mining claim. The first miner (defendant) had cut away the second miner's ditch in order to work his claim as before, and the Court held this did not give rise to the second miner's claim for damages under section 8. In dictum, the Court acknowledged that the broad purpose of the 1866 Act was to cure prior trespasses on the public domain, but made no specific comments on R.S. 2477.

The Central Pacific Ry. case did involve R.S. 2477, but only the validity of roads constructed prior to 1866. The Court said that, like section 9 construed in Jennison, section 8 (R.S. 2477) was, "so far as then existing roads are concerned, a voluntary recognition and confirmation of preexisting rights, brought into being with the acquiescence and encouragement of the general government." 284 U.S. at 473 (emphasis added). The underlined clause is ambiguous, but might be read as suggesting that R.S. 2477 could apply to highways constructed after 1866, and indeed this is how the Department applied it both before and after the Dunn case.

We find implicit support for the Department's view in Wilderness Society v. Morton, 479 F.2d 842, 882-83 (D.C. Cir. 1973), cert. denied, 411 U.S. 917 (1973), which upheld the validity of an R.S. 2477 grant of a right-of-way for a highway constructed in 1970 along the Trans-Alaska Pipeline. Dunn's holding to the contrary, therefore, does not find unambiguous support in the cases it cites as support for its holding, and most reported decisions assume to the contrary; as a result, it has not been followed by the Department, in the Ninth Circuit, or elsewhere.

While the Ninth Circuit is correct in finding that one major purpose of the 1866 Act, taken as a whole, was to validate various prior trespasses on the public lands, it does not follow a fortiori that R.S. 2477 applies only retroactively. The statutory language, fairly read, looks forward as well as backward in time, and the great bulk of case law also supports the Department's consistent administrative interpretation.

III. Determining whether an R.S. 2477 highway has been validly established is a question of federal law.

The common law doctrine of adverse possession does not operate against the federal government. United States v. California, 332 U.S. 19, 39-40 (1947); Texas v. Louisiana, 410 U.S. 702, 714 (1973), rehearing denied 411 U.S. 960 (1973); Drew v. Valentine, 10 F. 712 (5th Cir. 1883). The necessary corollary of this rule is that in order for a state or individual to gain an interest in land owned by the United States, there must be compliance with a federal statute which grants such interests.

The operative rule of construction applicable to such statutes is that grants by the federal government "must be construed favorably to the government and . . . nothing passes but what is conveyed in clear and explicit language -- inferences being resolved not against but for the government." Caldwell v. United States, 250 U.S. 14, 20 (1916); Wisconsin Central R.R. Co. v. United States, 164 U.S. 190, 202 (1896); Great Northern Ry. Co. v. United States, 315 U.S. 262, 272 (1942); Andrus v. Charlestone Stone Products Co., 436 U.S. 604, 617 (1978); cf. Leo Sheep v. United States, 440 U.S. 668 (1979). This doctrine applies to grants to states as well as grants to private parties. Lindsey v. Pacific Ry. Co., 64 U.S. 66, 86 (1859). Thus, in accordance with these rules, any ambiguities which exist in the statutory language must be resolved in favor of the federal government.

The question of whether a particular highway has been legally established under R.S. 2477 remains a question of federal law. It is a settled rule of statutory construction that all words in a statute are to be given effect. It must be assumed that Congress meant every word of a statute and that, therefore, every word must be given force and effect. United States v. Menasche, 348 U.S. 528, 538-39 (1955); Williams v. Sisseton-Wahpeton Sioux Tribal Council, 367 F. Supp. 1194, 1200 (D. South Dakota 1973); See also Zeigler Coal Co. v. Kleppe, 536 F. 2d 398, 406 (D.C. Cir. 1976); Wilderness Society v. Morton, 479 F. 2d 842, 856 (D.C. Cir. 1973),

cert. denied, 411 U.S. 917 (1973); United States v. Wong Kim Bo, 472 F. 2d 720, 722 (5th Cir., 1972); Consolidated Flower Mrkt. Inc.-Bay Area v. C.A.B., 205 F.2d 449 (9th Cir. 1953). This is especially so when, as here, there is no legislative history to suggest otherwise.4/

Thus in order to determine whether a valid R.S. 2477 highway exists on the federal lands, the several elements of the offer provided by the terms of the statute must be met. First, was the land reserved for a public use? Second, was there actual construction? Third, was what was constructed a highway?

A. Land reserved for public use

R.S. 2477 only grants rights of way over public lands "not reserved for public uses." Therefore, Indian reservations, Wildlife Refuges, National Parks, National Forests, Military Reservations, and other areas not under the jurisdiction of BLM are clearly not open to construction of highways. The extent to which withdrawals of public lands constitute "reservations for public uses" is potentially complicated — see, e.g., Executive Order 6910 (54 I.D. 539) (1934); Wilderness Society v. Morton, 479 F.2d 842, 882, n.90 (D.C. Cir. 1973) — but for present purposes it is sufficient to observe that R.S. 2477 was an offer of rights-of-way only across public lands "not reserved for public uses."

B. Construction

Consistent with the rules of statutory interpretation previously discussed, the choice of the term "construction" in R.S. 2477 necessitates that it be considered an essential element of the offer made by Congress. "Construction" is defined in Webster's New International Dictionary, (2d Ed. 1935) (unabridged) at 572, as: "act of building; erection; act of devising and forming." Construction ordinarily means more than mere use, such as the creation of a track across public lands by the passage of vehicles. Accordingly, we believe that the plain meaning of the term "construction," as used in R.S. 2477, is that in order for a valid right-of-way to come into existence, there must have been the actual building of a highway; i.e., the grant could not be perfected without some actual construction.

4/ An analogy can be drawn from the law of contracts. It is a basic tenet of contract law that no more than is offered is susceptible of a valid acceptance. Hadcox v. Northern Natural Gas Co., 259 F. Supp. 781, 783 (D.C. Okla. 1966). Thus, in order for rights-of-way to have been validly accepted under the instant statute, such acceptance must have been performed in accordance with the terms and conditions of the offer. Minneapolis & St. Lk. Co. v. Columbus Rolling Mill Co., 119 U.S. 149, 151 (1886); Tilley v. County of Cook, 103 U.S. 155, 161 (1880); National Bank v. Ball, 101 U.S. 43, 49 (1879).

We believe the correct interpretation on this point is that adopted by the New Jersey Supreme Court in Paterson R.R. Co. v. City of Paterson, 80 A. 68 (N.J. 1912) construing the nearly identical phrase "construction of a highway" which appeared in a 1911 state statute. The court noted (80 A. at 69-70, emphasis added):

> [T]he first question that arises is what is meant by the "construction of a highway." Does it mean simply to lay out the highway on paper and file a map thereof in some public office, or does it contemplate such grading, curbing, flagging, planking, or other physical alteration or addition as may be necessary to prepare the crossing for use by horses, wagons and other vehicles, [and] foot passengers. . . . The plain words of the statute indicate to my mind that the latter is the intention.
>
> To survey a piece of lands and make a map of it, to designate it as a public street, and to file the map cannot in any sense be said to be the construction of a highway. To construct a building it is not sufficient to make a drawing of it and file it: it is necessary to make a physical erection which can be used as buildings ordinarily are used, and so I think that a highway cannot be said to be "constructed" until it shall have been made ready for actual use as a highway. The word "construction" implies the performance of work; it implies also the fitting of an object for use or occupation in the usual way, and for some distinct purpose; it means to put together the constituent parts, to build, to fabricate, to form and to make. The use of the word in connection with a highway manifestly means the preparation of the highway for actual ordinary use, and not the mere delineation thereof, or the taking of land for the purpose of a street.

The federal court decisions are not helpful in interpreting "construction." For example, both Dunn and Wilderness Society involved roads actually constructed. One might find a faint suggestion in the Central Pacific Ry. case that an R.S. 2477 highway may be created solely by actual use,5/ but the Court never addressed the question whether some "construction" in the ordinary, dictionary sense of the word was necessary.

5/ See 284 U.S. at 467, where the Court noted in passing that the original road in question "was formed by the passage of wagons, etc., over the natural soil . . . ." Earlier the Court noted that the highway had been "laid out and declared by the county in 1859, and ever since has been maintained." 284 U.S. at 465.

The administrative difficulty of applying a standard other than actual construction would be potentially unmanageable. If actual use were the only criterion, innumerable jeep trails, wagon roads and other access ways -- some of them ancient, and some traversed only very infrequently (but whose susceptibility to use has not deteriorated significantly because of natural aridity in much of the west) -- might qualify as public highways under R.S. 2477.6/ Requiring highways to be constructed will prove, we believe, much more workable in determining whether an R.S. 2477 right-of-way existed prior to October 21, 1976.7/

6/ For example, the State of Utah, which argues that R.S. 2477 highways can be perfected merely by public use without construction, is by state law in the process of mapping such "roads" which it considers were in existence as of October 21, 1976, the date of the repeal of R.S. 2477. (Section 27-15-3, Utah Code Annotated (1976).) Our initial review of these maps indicates that the State of Utah considers all of the numerous trails across federal lands to be R.S. 2477 highways, regardless of extent of construction, maintenance or use.

7/ In the debates leading up to the repeal of R.S. 2477 in FLPMA, there occurred a colloquy between Senators Stevens (Alaska) and Haskell (Colorado) which mirrors the confusion in the reported decisions about the meaning of R.S. 2477. See generally 120 Cong. Rec. 22265-84 (July 8, 1974). For example, Senator Stevens refers at one point to "de facto public roads" which are created from trails that "have been graded and then graveled and then are suddenly maintained by the state. He was concerned that repeal of R.S. 2477 might eliminate rights-of-way for such highways if there had been no formal declaration of a highway under R.S. 2477, even if the state "did, in fact, build public highways across federal land." Senator Haskell assured him that such formal perfection of the grant was not necessary; i.e., that actual existing use as a public highway under state law at the time FLPMA becomes law is sufficient to protect the highway right-of-way as a valid existing right not affected by the repeal of R.S. 2477. Senator Haskell referred to a North Dakota state court decision which recognized both formal and informal acceptance of the R.S. 2477 grant, the latter being done by "uses sufficient to establish a highway under the laws of the State." Whether either Senator thought use without construction was sufficient is doubtful. Senator Stevens raised the point in the context of highways which had been graded, graveled and otherwise built. Finally, of course, this debate, occurring nearly 110 years after enactment of R.S. 2477, sheds no light on Congress' intent in 1866.

This is not to say that if a road was originally created merely by the passage of vehicles, it can never qualify for a right-of-way grant under R.S. 2477. To the contrary, we think such a road can become a highway within the meaning of R.S. 2477 if state or local government improves and maintains it by taking measures which qualify as "construction"; i.e., grading, paving, placing culverts, etc. If the highway has been "constructed" in this sense prior to October 21, 1976, it can qualify for an R.S. 2477 right-of-way whether or not constructed ab initio.6/

C. Highway

A highway is a road freely open to everyone; a public road. See, e.g., Webster's New World Dictionary, (College Ed. 1951) at 686; Harris v. Hanson, 75 F. Supp. 481 (D. Idaho 1948); Karb v. City of Bellingham, 377 P.2d 964 (Wash. 1963). Because a private road is not a highway, no right-of-way for a private road could have been established under R.S. 2477. Insofar as the dicta in United States v. 9,947.71 Acres of Land, 220 F. Supp. 328 (D. Nev. 1963) concludes otherwise, we believe the court was clearly wrong. The court's error in that case was in confusing the standards of R.S. 2477 with other law of access across public lands; i.e., the road at issue in that case was a road to a mining claim, and the Department had previously distinguished such roads from public highways such as might be constructed pursuant to R.S. 2477. See Rights of Mining Claimants to Access over the Public Lands to Their Claims, 66 I.D. 361, 365 (1959). The court in 9,947.71 Acres of Land specifically found that the road in question was not a public road or highway, 220 F. Supp. at 336-37, and it therefore follows that it could not have been an R.S. 2477 road.7/ Rather, it was an access road under the mining law of 1872, and even assuming the court correctly concluded that its taking by the government was compensable, the court's discussion of R.S. 2477 was not pertinent to the legal question presented.

In summary, it is our view that R.S. 2477 was an offer by Congress that could only be perfected by actual construction, whether by the state or local government or by an authorized private individual, of a highway open to public use, prior to October 21, 1976, on public lands not reserved

6/ It is not necessary to deal herein with whether and how an R.S. 2477 right-of-way can be terminated. Because only a right-of-way rather than title is conveyed, however, it seems clear that such a right-of-way can be terminated by abandonment or failure to maintain conditions suitable for use as a public highway. Cf. United States v. 9,947.1 Acres of Land, 220 F. Supp. 328, 334 (D. Nev. 1963).

7/ In fact, the State of Nevada had officially taken the position that the road in question was not considered a public road or highway. See 220 F. Supp. at 337.

for public uses. Insofar as highways were actually constructed over unreserved public land by state or local governments or by private individuals under state or local government imprimatur prior to October 21, 1976, we do not question their validity.

D. State law construing R.S. 2477

As noted above, state court decisions and state statutes are in conflict with each other on the issue of how a right-of-way under R.S. 2477 is perfected. Generally, the approach of the states appears to fall into three general categories. First, some (Kansas, South Dakota and Alaska) have held that state statutes which purport to establish such rights-of-way along all section lines are sufficient to perfect the grant upon enactment of the state statute, even if no highway had either been constructed or created by use. Tholl v. Noles, 70 P. 881 (Kan. 1902); Pederson v. Canton Twp., 34 N.W. 2d 172 (S.D. 1948); Girves v. Kenai Peninsula Borough, 536 P.2d 1221 (Alas. 1975), contra Warren v. Chouteau County, 265 P. 670 (Mont. 1928). Second, states such as Colorado, Oregon, Wyoming, New Mexico, and Utah have held that R.S. 2477 rights-of-ways can be perfected solely by public use, without any construction or maintenance. Nicolas v. Grassle, 267 P. 196 (Colo. 1928); Montgomery v. Somers, 90 P. 674 (Ore. 1907); Hatch Bros Co. v. Black, 165 P. 518 (Wyo. 1917); Wilson v. Williams, 67 P. 2d 883 (N.M. 1939); Lindsay Land & Livestock Co. v. Charnos, 285 P. 646 (Utah 1930). Third, Arizona courts have held that such rights-of-way can be established only by a formal resolution of local government, after the highway has been constructed. Perfection by mere use is not recognized. Tucson Consol. Copper Co. v. Reese, 100 P. 777 (Ariz. 1906).

The above analysis of the plain meaning of R.S. 2477 shows that the Arizona interpretation is the only correct one, and that the positions taken by other states do not meet the express requirements of the statute. For example, the Kansas, South Dakota and Alaska approach based on section lines does not even require that there be a highway or access route, much less that it be constructed. The approach taken by states such as Colorado, Utah, New Mexico, Oregon and Wyoming, that R.S. 2477 rights-of-way may be perfected by access ways created by use alone, without any construction, also fails to meet the plain requirement of R.S. 2477 that such highways be "constructed."

The term "construction" must be construed as an essential element of the grant offered by Congress; otherwise, Congress' use of the term is meaningless and superfluous. The states could accept only that which was offered by Congress and not more. Thus, rights-of-way which states purported to accept but on which highways were not actually constructed prior to October 21, 1976, do not meet the requirements of R.S. 2477 and therefore no perfected right-of-way grant exists.

IV. The regulation at 43 C.F.R. § 2822 (1979) did not make the question of whether a highway has been established under R.S. 2477 a question of state law.

The language of this regulation first appeared in a Circular dated May 25, 1938 (Circ. 1237 a, ¶ 54). At pertinent part, the regulation provides (43 C.F.R. § 2822.1-1):

> No application should be filed under R.S. 2477, as no action on the part of the Government is necessary.

This is a correct statement, but it does not mean that the grant may be perfected on whatever terms a state deems appropriate, without regard to the conditions on which the grant is offered.

Rather, a state claim of an R.S. 2477 right-of-way is like a miner's location of a claim under the Mining Law of 1872, for which no application is required either. Like a mining claim, however, a claim to an R.S. 2477 right-of-way does not necessarily mean that a valid right exists. The United States has often successfully challenged the validity of mining claims because of the failure of the claimant to establish rights under that law. See, e.g., Cameron v. United States, 252 U.S. 450 (1920); United States v. Coleman, 390 U.S. 599 (1968); Nickel v. Oil Shale Corp., 466 U.S. 48 (1976). The Department has not previously determined the validity of claimed rights under R.S. 2477, because it has had no land or resource management reason to do so; i.e., conflicts generally did not arise between the existence of claimed rights-of-way under R.S. 2477 and the management of the public lands affected by such claims. If there is a resource management reason to do so, such as the review of public lands for wilderness values, claimed rights-of-way may be reviewed to determine their validity under R.S. 2477.

43 C.F.R. § 2822.2-1 further provides:

> Grants of rights-of-way under R.S. 2477 are effective upon construction or establishment of highways in accordance with the State laws over public lands that are not reserved for public uses.

In the context of the above analysis, the question presented by this sentence is whether "establishment" can mean less than "construction." We think lawfully it could not because the explicit language of R.S. 2477 required "construction." If "establishment" as used in the Circular and subsequent regulations meant less than "construction," it was an unauthorized exercise of power by the Secretary of the Interior. Congress has plenary power over the public lands and the Secretary can only do those things authorized by Congress. See, e.g., Kleppe v. New Mexico, 426 U.S. 529 (1976).

Given the statutory requirement of construction, the phrase "or establishment in accordance with the State laws" must mean that a state could lawfully require more than mere construction of the highway in order to perfect the R.S. 2477 grant; i.e., "construction" is the minimum requirement of federal law but the State could impose on itself additional requirements in order to perfect a grant under R.S. 2477. This in fact is what Arizona has apparently done; i.e., construction of the highway is sufficient as a matter of federal law to qualify for a right-of-way under R.S. 2477, but Arizona has imposed upon itself the additional requirement of formal approval of the grant by local government. Highways thus might be "constructed" under R.S. 2477, but the right-of-way won't be accepted as far as Arizona is concerned, or "established" in terms of 43 C.F.R. § 2822.2-1, until local government resolves to accept or designate them.

V. Relationship between "roadless" as used in section 603 of FLPMA and "highway" as used in R.S. 2477.

Section 603 of FLPMA (43 U.S.C. § 1782) mandates an inventory of all public lands initially to determine which lands contain wilderness characteristics as defined in the Wilderness Act (16 U.S.C. § 1131 et seq.), contain 5,000 acres or more and are roadless. Areas which meet these standards must be managed to protect their suitability for wilderness preservation until Congress determines whether or not they should be placed in the wilderness system. Critical to this process is the meaning of the term "roadless."

As discussed in a Solicitor's Opinion interpreting section 603 of FLPMA (86 I.D. 89, 93 (1979)), the definition used by the BLM in administering section 603 comes from the House Report on FLPMA and provides as follows:

> The word "roadless" refers to the absence of roads which have been improved and maintained by mechanical means to insure relatively regular and continuous use. A way maintained solely by the passage of vehicles does not constitute a road.

H.R. Rep. No. 1163, 94th Cong., 2d Sess. 17 (1976).

The above analysis shows that an area containing a highway validly constructed under the offer of R.S. 2477 is of necessity not roadless under section 603 of FLPMA, because an area containing a valid R.S. 2477 highway can never meet the definition of "roadless" in the House Report. That is, a valid R.S. 2477 right-of-way must be a public highway constructed (or, as the House Report on section 603 indicates, "improved and maintained by mechanical means") over unreserved public lands, and can, therefore, never be a way established merely by the passage of vehicles. Read in

this way, the two statutes are consistent with each other,10/ and with the settled rules of statutory construction that Congress is presumed to be cognizant of prior existing law,11/ and that statutes should be construed consistent with each other where reasonably possible.

Finally, it should be noted that in states such as Alaska, which have enacted statutes designating all section lines as highways, purporting to constitute the perfection of the R.S. 2477 grant, See Girves v. Kenai Peninsula Borough, 536 P. 2d 1221, 1225 (Alas. 1975), no public lands in the entire state would qualify for wilderness study because there would be no "roadless" areas over 640 acres, and section 603 of FLPMA requires a roadless area of 5000 acres as a minimum in order to be considered for wilderness area designation. There is absolutely no indication in the legislative history of FLPMA that Congress thought such a bizarre result would be possible. On the contrary, all indications are that Congress thought that all areas of public lands without constructed and maintained roads would be considered for possible preservation as wilderness.

I trust you will find this explanation of our position useful. I look forward to our meeting on May 2 to discuss this further.

Sincerely,

FREDERICK N. FERGUSON

DEPUTY SOLICITOR

10/ It is significant that in formulating its definition of "roadless" that the House Committee identified no conflict between that definition and R.S. 2477. See H.R. Rep. No. 1163, 94th Cong., 2d Sess. 17 (1976). The transcript of the House Committee markup session reveals that Congressman Steiger of Arizona suggested the definition of "road" which appears in the House Report. Arizona is an arid state where "ways" can be created and used as roads merely by the passage of vehicles, and Congressman Steiger took some pains to draw the distinction between a "way" and a "road" for wilderness purposes. The latter, he insisted, was any access route improved or maintained in any way, such as by grading, placing of culverts, or making of bar ditches. See Transcript of Proceedings, Subcommittee on Public Lands of House Committee on Interior and Insular Affairs, Sept. 22, 1975, at 329-33.

11/ See, e.g., United States v. Robinson, 359 F. Supp. 52 (D. Fla. 1973); In re Vinarsky, 267 F. Supp. 446 (D. N.Y. 1968).

THE SECRETARY OF THE INTERIOR
WASHINGTON

Memorandum

To: Secretary

From: Acting Assistant Secretary for Fish and Wildlife and Parks
Assistant Secretary for Land and Minerals Management

Subject: Departmental Policy on Section 8 of the Act of July 26, 1866, Revised Statute 2477 (Repealed), Grant of Right-of-Way for Public Highways (RS 2477)

Although RS 2477 was repealed nearly 12 years ago, controversies periodically arise regarding whether a public highway was established pursuant to the congressional grant under RS 2477 and the extent of rights obtained under that grant. Under RS 2477, the United States had (has) no duty or authority to adjudicate an assertion or application. However, it is necessary in the proper management of Federal lands to be able to recognize with some certainty the existence, or lack thereof, of public highway grants obtained under RS 2477.

With the passage of the Federal Land Policy and Management Act, the Bureau of Land Management (BLM) developed procedures, policy, and criteria for recognition, in cooperation with local governments, of the existence of such public highways and notation to the BLM's land records. This has allowed the BLM to develop land use plans and to make appropriate management decisions that consider the existence of these highway rights.

Issues have recently been raised by the State of Alaska and others which question not only the BLM policy but also the management actions by other bureaus within the Department. We have had the BLM review and report on the various issues and concerns (Attachment 2) and consulted with the State of Alaska, the BLM, the Fish and Wildlife Service, and the National Park Service.

We believe that the land management objectives of the Department will be improved with adoption of a Departmental policy and recommend that the attached policy (Attachment 1) be adopted for Departmentwide use.

Celebrating the United States Constitution

RS 2477
Section 8 of the Act of July 26, 1866
Revised Statute 2477 (43 U.S.C. 932)
Repealed October 21, 1976

Section 8 of the Act of July 26, 1866, provided:

> "The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted."

Although this statute, 43 U.S.C. 932 (RS 2477), was repealed by Title VII of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2793, many rights-of-way (R/W) for public highways obtained under the statute exist or may exist on lands administered by the Department and other Federal agencies. The existence or lack of existence of such highway R/Ws has material bearing on the development and implementation of management plans for conservation system units and other areas of Federal lands. Land managing Bureaus of the Department should develop, as appropriate, internal procedures for administratively recognizing those highways meeting the following criteria and recording such recognized highways on the land status records for the area managed by that Bureau.

Acceptance:

To constitute acceptance, all three conditions must have been met:

1. The lands involved must have been public lands, not reserved for public uses, at the time of acceptance.

2. Some form of construction of the highway must have occurred.

3. The highway so constructed must be considered a public highway.

Public lands, not reserved for public uses:

Public lands were those lands of the United States that were open to the operation of the various public land laws enacted by Congress.

Public lands, not reserved for public uses, do not include public lands reserved or dedicated by Act of Congress, Executive Order, Secretarial Order, or, in some cases, classification actions authorized by statute, during the existence of that reservation or dedication.

Public lands, not reserved for public uses, do not include public lands pre-empted or entered by settlers under the public land laws or located under the mining laws which ceased to be public lands during the pendancy of the entry, claim, or other.

Construction:

Construction must have occurred while the lands were public lands, not reserved for public uses.

Construction is a physical act of readying the highway for use by the public according to the available or intended mode of transportation - foot, horse, vehicle, etc. Removing high vegetation, moving large rocks out of the way, or filling low spots, etc., may be sufficient as construction for a particular case.

Survey, planning, or pronouncement by public authorities may initiate construction, but does not by itself, constitute construction. Construction must have been initiated prior to the repeal of RS 2477 and actual construction must have followed within a reasonable time.

Road maintenance over several years may equal actual construction.

The passage of vehicles by users over time may equal actual construction.

Public Highway:

A public highway is a definitive route or way that is freely open for all to use. It need not necessarily be open to vehicular traffic for a pedestrian or pack animal trail may qualify. A toll road or trail is still a public highway if the only limitation is the payment of the toll by all users. Multiple ways through a general area may not qualify as a definite route, however, evidence may show that one or another of the ways may qualify.

The inclusion of a highway in a State, county, or municipal road system constitutes being a public highway.

Expenditure of construction or maintenance money by an appropriate public body is evidence of the highway being a public highway.

Absent evidence to the contrary, a statement by an appropriate public body that the highway was and still is considered a public highway will be accepted.

Ancillary uses or facilities usual to public highways:

Facilities such as road drainage ditches, back and front slopes, turnouts, rest areas, and the like, that facilitate use of the highway by the public are considered part of the public highway R/W grant.

Other facilities such as telephone lines, electric lines, etc., that were often placed along highways do not facilitate use of the highway and are not considered part of the public highway R/W grant. An exception is the placement of such facilities along such R/W grants on lands administered by the Bureau of Land Management prior to November 7, 1974. Prior to this date, the requirement of filing an application for such facilities was waived. Any new facility, addition, modification of route, etc., after that date requires the filing of an application/permit for such facility. Facilities that were constructed, with permission of the R/W holder, between November 7, 1974, and the effective date of this policy, should, except in rare and unusual circumstances, be accommodated by issuance of a R/W or permit authorizing the continuance of such facility.

Width:

For those highway R/Ws in the State, county, or municipal road system, i.e., the R/W is held and maintained by the appropriate government body, the width of the R/W is as specified for the type of highway under State law, if any, in force at the time the grant could be accepted.

In some cases, the specific R7W may have been given a lesser or greater width at the time of creation of the public highway than that provided in State law.

Where State law does not exist or is not applicable to the specific highway R/W, the width will be determined in the same manner as below for non-governmentally controlled highways.

Where the highway R/W is not held by a local government or State law does not apply, the width is determined from the area, including appropriate back slopes, drainage ditches, etc., actually in use for the highway at the later of (1) acceptance of the grant or (2) loss of grant authority under RS 2477, e.g., repeal of RS 2477 on October 21, 1979, or an earlier removal of the land from the status of public lands not reserved for public uses.

Abandonment:

Abandonment, including relinquishment by proper authority, occurs in accordance with State, local or common law or Judicial precedence.

Responsibilities of Agency and Right-of-Way Holder:

This policy addresses the creation and abandonment of property interests under RS 2477 and the respective property rights of the holder of a R/W and the owner of the servient estate.

Under the grant offered by RS 2477 and validly accepted, the interests of the Department are that of owner of the servient estate and adjacent lands/resources. In this context, the Department has no management control under RS 2477 over proper uses of the highway and highway R/W unless we can demonstrate unnecessary degradation of the servient estate. It should be noted, however, that this poli , does not deal with the applicability, if any, of other federal, state, and/or local laws on the management or regulation of R/Ws reserved pursuant to RS 2477.

Reasonable activities within the highway R/W are within the jurisdiction of the holder. As such, the Department has no authority under RS 2477 to review and/or approve such reasonable activities. However, review and approval may or may not occur, depending upon the applicability, if any, of other federal, state, or local laws or genera' relevance to the use of a R/W.

Memorandum

To: Superintendents, Arches, Bryce Canyon, Canyonlands, Capitol Reef and Zion National Parks, Dinosaur National Monument and Glen Canyon National Recreational Area

From: Regional Director, Rocky Mountain Region, Denver Colorado

Subject: Interim Procedures for Processing RS 2477 Right-of-Way Assertions

The Rocky Mountain Region has been working closely with the Alaska Region to develop a uniform set of procedures for handling assertions of rights-of-way under Section 8 of the Act of July 26, 1866, commonly known as Revised Statute (RS) 2477. A copy of the latest version of these procedures is enclosed.

These procedures are to be utilized in this region in the handling of any RS 2477 assertions on an interim basis pending the finalization and adoption of service-wide procedures.

Any comments should be directed to Dick Young of our Land Resources Division at (303) 969-2610.

(Signed) Boyd Evison

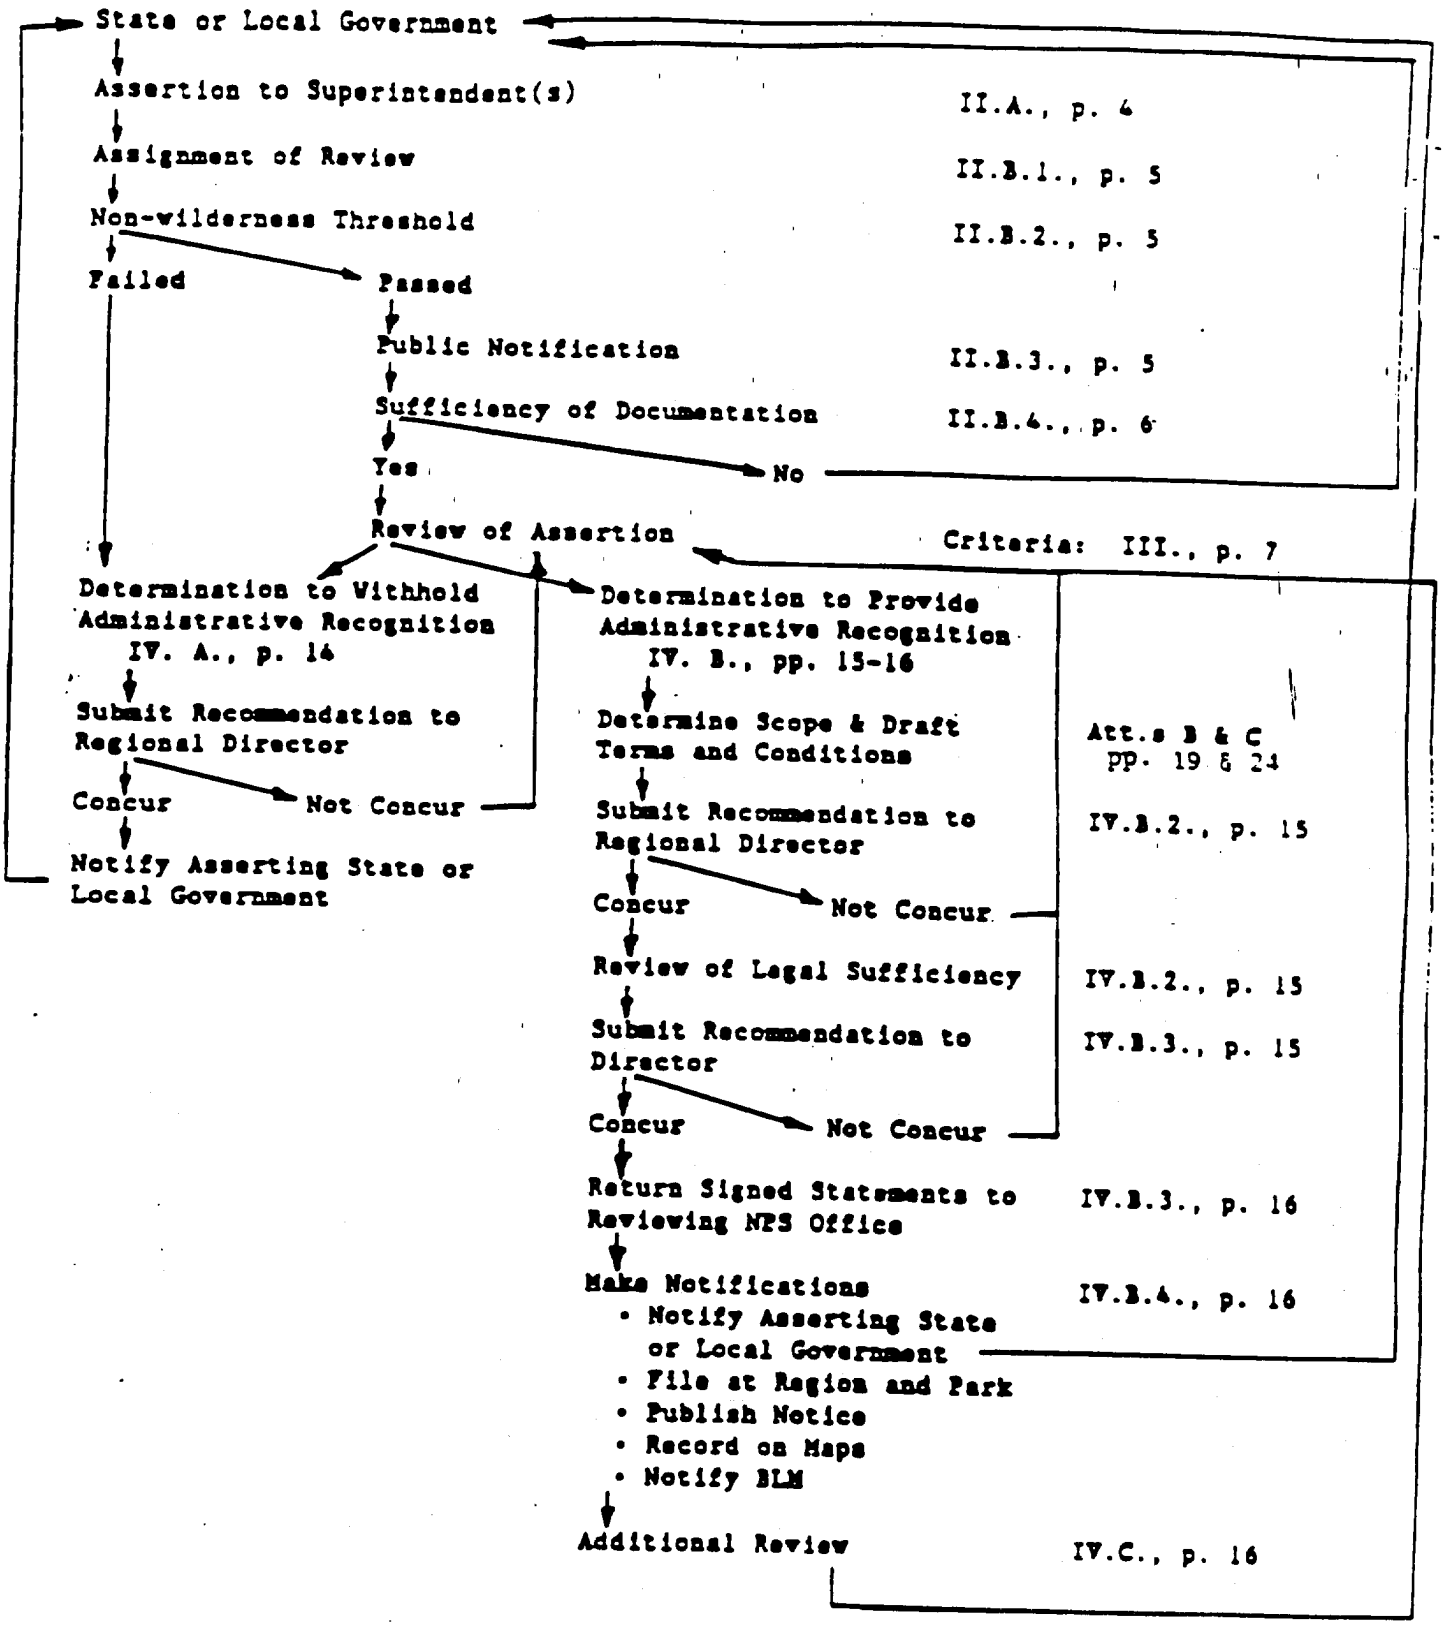
NATIONAL PARK SERVICE PROCEDURES FOR ASSERTION, REVIEW, AND DETERMINATIONS OF REVISED STATUTE 2477 RIGHTS-OF-WAY

TABLE OF CONTENTS

OVERVIEW OF PROCEDURES



NATIONAL PARK SERVICE PROCEDURES FOR ASSERTION, REVIEW, AND DETERMINATIONS OF REVISED STATUTE 2477 RIGHTS-OF-WAY

I. PREAMBLE

Consistent with the Organic Act of the National Park Service, 16 U.S.C. 1, and other applicable federal law and regulation, this document sets forth National Park Service (NPS) procedures for accepting assertions, reviewing assertions, and making administrative determinations on assertions of Revised Statute 2477 (RS 2477) rights-of-way. These procedures shall guide NPS administrative actions in the absence of applicable determinations by a court of competent jurisdiction.

These procedures represent the initial step in NPS management of RS 2477 rights-of-way. After determining that an asserted RS 2477 right-of-way qualifies for administrative recognition, the NPS shall determine the scope of the right-of-way and draft terms and conditions on the use of the right-of-way as necessary to prevent derogation of park values.

A. Purpose

These procedures:

1. implement Department of the Interior policy on RS 2477 (see Part I.C.);

2. describe the documentation and steps necessary to assert an RS 2477 right-of-way on NPS lands (see Part II.A.);

3. provide a process and standards for NPS review of RS 2477 assertions (see Parts II.B., III., and IV.); and

4. provide a standardized process for NPS administrative recognition of RS 2477 rights-of-way (see Part IV.).

B. Definitions

1. Acceptance of the RS 2477 grant: the act of construction of a public highway across unreserved public lands by a non-federal entity before repeal of RS 2477.

2. Assertion: a written statement by a state or local government submitted to a superintendent to declare and document the existence of an RS 2477 right-of-way.

3. Administrative Recognition: an acknowledgement by the NPS of the probable existence of an RS 2477 right-of-way.

4. "When the RS 2477 grant was available": the period(s) of time between enactment and repeal of RS 2477 when subject lands were not reserved for public purposes.

5. State or local government: a non-federal government or non-federal governmental agency with legal authority over and responsibility for public highways.

6. Non-federal entity: a state or local government or any individual, group, or person acting in a non-federal capacity.

C. Background

Revised Statute 2477, Section 8 of the Act of July 26, 1866 (43 U.S.C. 932), repealed October 21, 1976, provided:

> The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted.

RS 2477 was a congressional grant of right-of-way. Although no action by a federal agency was required for a right to be obtained under RS 2477, no right was obtained unless the grant was "accepted." A state or local government or individual accepted an RS 2477 grant for the public by constructing a public highway across unreserved public lands. The validity of an accepted RS 2477 grant and the scope of the congressional offer is defined by federal, state, and common law.

Congress repealed RS 2477 on October 21, 1976, by enactment of §706 of the Federal Land Policy and Management Act (FLPMA). 90 Stat. 2793. Repeal was subject to valid existing rights. FLPMA §701. Therefore, rights-of-way for public highways accepted pursuant to RS 2477 prior to repeal may exist across subsequently established NPS lands.

D. Judicial Recognition

A determination by a State or Federal Court that all or a portion of the asserted right-of-way has been judicially determined to be a "road" is conclusive, and no additional administrative review is required. Such judicial determinations should be sent to the Regional Office so that records may be so noted.

E. Authority to Administratively Recognize

The Organic Act of the National Park Service, 16 U.S.C. §1, and specific park enabling legislation require the NPS to manage lands to conserve scenic, natural, historic, and wildlife resources for enjoyment by future generations. Although the NPS was not delegated adjudicative authority over RS 2477 assertions by that statute, the bureau must address RS 2477 assertions to rationally plan park management and fulfill legislative mandates.

The Secretary of the Interior issued a policy statement on RS 2477 rights-of-way on December 7, 1988. See Attachment E. This policy statement set the criteria that must be met for RS 2477 right-of-way assertions to be recognized by bureaus of the Department of the Interior. It also addressed several management issues and stated that:

> Land managing Bureaus of the Department should develop, as appropriate, internal procedures for administratively recognizing those highways meeting the following criteria and recording such recognized highways on the land status records for the area managed by that Bureau.

Under the Secretary's policy, NPS administrative recognition of an asserted RS 2477 right-of-way constitutes a finding that there exists sufficient evidence to support probable affirmative action on the assertion by a court of competent jurisdiction. NPS administrative recognition does not grant any interest in land; NPS administrative recognition merely acknowledges for land management purposes the probability of a pre-existing right-of-way.

The NPS has the authority and statutory obligation to manage RS 2477 rights-of-way in order to prevent derogation of park values. See Attachment C.

II. PRE-REVIEW PROCEDURES

The following requirements must be met by the asserting party and the following procedures shall be completed by the NPS before review of an asserted RS 2477 right-of-way may begin.

A. Assertion Requirements

1. Identification of Asserting Party - Assertions must be made by the state or local government with authority over and responsibility for public highways in the area of the asserted right-of-way.

   If a potentially valid RS 2477 right-of-way exists but has not been asserted, the NPS may, at its discretion, independently initiate an action to determine the status of the subject land.

2. Identification of Asserted Right-of-way - Assertions must be accompanied by maps of sufficient detail to identify the asserted right-of-way. Asserted RS 2477 rights-of-way must be identified in such a manner that the asserted right-of-way may be accurately located on the ground by a competent engineer or land surveyor. The NPS may require:

   - detailed maps;
   - a legal description;
   - survey records; or
   - dated aerial photographs.

3. Submittal - An RS 2477 right-of-way must be asserted to the NPS by the appropriate state or local government to be administratively recognized. An assertion is a written claim that a public highway was constructed over unreserved public land before repeal of RS 2477. Assertions must be submitted to the superintendent(s) of the NPS unit(s) with jurisdiction over the lands affected by the asserted right-of-way.

4. Documentation - The asserting state or local government must provide the NPS with legal and historical documentation from appropriate competent authorities to document the construction and public nature of an asserted RS 2477 right-of-way with reasonable certainty pursuant to the review criteria in Part III.

5. Deadline - Although Congress repealed RS 2477 on October 21, 1976, there is currently no deadline for asserting RS 2477 rights-of-way.

6. Fees - No fees shall be charged for reviewing and processing assertions of RS 2477 rights-of-way.

B. NPS Actions

1. Assignment of Review - Superintendents shall notify the appropriate regional director upon receiving an RS 2477 assertion. Regional offices shall assist assertion review as necessary to facilitate consistent and equitable determinations. Superintendents may request regional office review of an RS 2477 assertion if a park lacks necessary staff or training; assertion review will require staff with specialties in realty, historical analysis, and federal, state, local, and common law.

   The authority to approve a determination against administrative recognition of an asserted RS 2477 right-of-way shall rest with regional directors, and the authority to approve determinations for administrative recognition shall rest with the Director of the NPS. However, regardless of the office conducting review of an assertion, superintendents shall be the primary initial and continuing contact for state or local governments submitting assertions.

   The Office of the Regional Solicitor should be involved early in the review process, as appropriate.

2. Non-wilderness Threshold - The reviewing NPS office shall determine if an asserted RS 2477 right-of-way crosses any lands within the Wilderness Preservation System or any lands proposed for addition to the Wilderness Preservation System by the NPS. The reviewing NPS office shall draft a "Determination to Withhold Administrative Recognition" for any asserted RS 2477 rights-of-way across such lands and proceed pursuant to Part IV.A. without further review.

   Rights-of-way and access procedures affecting wilderness areas in Alaska are governed by applicable provisions of ANILCA and regulations in 43 C.F.R. 36 and 36 C.F.R. 13 and apply in lieu of the above.

3. Public Notification - The NPS shall accept and review pertinent information on an RS 2477 assertion from all sources. After an assertion has passed the non-wilderness threshold, the NPS shall publish such public

Wilderness?

notice as is considered necessary that it is beginning review of an RS 2477 assertion.

4. Sufficiency of Documentation - The reviewing NPS office shall make a preliminary determination on the sufficiency of documentation accompanying an RS 2477 assertion. Each assertion must fulfill the requirements of Part II.A. above and include sufficient documentation to allow analysis of the assertion pursuant to Part III.

   After making an initial determination of sufficiency, the superintendent shall make one of the following written notifications to the asserting party:

   a. insufficient documentation was provided to allow review. This notification shall indicate the nature of the deficiencies.

   b. sufficient documentation was provided to initiate review. This notification shall also state that the NPS reserves the right to require additional information as necessary.

5. Coordination with Other Agencies - It is the asserting party's responsibility to file RS 2477 assertions with all affected land managers.

   Determinations to administratively recognize or withhold recognition of asserted RS 2477 rights-of-way may affect such determinations by other land managers where RS 2477 rights-of-way cross lands under multiple administration. Therefore, the NPS shall coordinate review of RS 2477 assertions with appropriate adjacent land managers. Every effort should be made to reach a consensus decision with other agencies, however, the NPS shall make independent administrative determinations for those sections of asserted RS 2477 rights-of-way that cross NPS lands.

BLM
4281.

III. REVIEW CRITERIA

The NPS shall accept pertinent information on an RS 2477 assertion from any source. Assertions shall be reviewed for compliance with the following criteria quoted from the Secretary of the Interior's policy statement on RS 2477 rights-of-way (12/07/88). See Attachment E. The NPS office reviewing an RS 2477 assertion shall evaluate the assertion as explained after each quote.

A. Unreserved Public Land

"The lands involved must have been public lands, not reserved for public uses, at the time of acceptance."

"Public lands were those lands of the United States that were open to the operation of the various public land laws enacted by Congress."

"Public lands, not reserved for public uses, do not include public lands reserved or dedicated by Act of Congress, Executive Order, Secretarial Order, or, in some cases, classification actions authorized by statute, during the existence of that reservation or dedication."

"Public lands, not reserved for public uses, do not include public lands pre-empted or entered by settlers under the public land laws or located under the mining laws which ceased to be public lands during the pendency of the entry, claim, or other."

1. Unreserved Public Lands Defined - public lands were unreserved if such lands were not closed to the operation of any public land laws, and therefore:

   - not withdrawn by federal legislation;
   - not withdrawn by executive order;
   - not withdrawn by departmental order (e.g., Public Land Order 4582, December 14, 1968 reserved all federal land in Alaska not previously reserved); or
   - not pre-empted, entered, appropriated, reserved, located, or otherwise disposed of under the public land laws or mining laws.

2. Determination of Land Status - Between 1866 and 1976 it is possible that a single parcel of land was subject to and not subject to RS 2477 numerous times through various land status changes. Thus, a highway initiated while land was reserved might subsequently qualify under RS 2477 if the conditions were later met when the land returned to the status of unreserved public lands. The NPS shall determine and record the dates during which the subject lands were public lands, not reserved for public uses, by reviewing any or all of the following public land records:

- Bureau of Land Management (BLM) Master Title Plats (MTP) and Historical Indices (HI),
- NPS land status records,
- BLM and other agency land status records, and
- State and local recording office records.

NOTE: The reviewing NPS office must review any applicable withdrawals to determine the actual conditions of the withdrawals and whether a withdrawal effectively closed the subject lands to the operation of RS 2477. The Regional Solicitor should be consulted as to whether or not lands were actually closed.

B. Construction

"Some form of construction of the highway must have occurred."

"Construction must have occurred while the lands were public lands, not reserved for public uses."

"Construction is a physical act of readying the highway for use by the public according to the available or intended mode of transportation - foot, horse, vehicle, etc. Removing high vegetation, moving large rocks out of the way, or filling low spots, etc., may be sufficient as construction for a particular case."

"Survey, planning, or pronouncement by public authorities may initiate construction but does not, by itself, constitute construction. Construction must have been initiated prior to the repeal of RS 2477 and actual construction must have followed within a reasonable time."

"Road maintenance over several years may equal actual construction."

"The passage of vehicles by users over time may equal actual construction."

1. Construction Defined - For the purpose of NPS review, any one of the following may have constituted construction if sanctioned by applicable federal, state, local, or common law in effect at a time when the RS 2477 grant was available.

   a. actual physical modifications were made by non-federal entities to create a physically continuous and clearly defined and demarcated route for public highway purposes;

   b. substantial maintenance was conducted by non-federal entities for public highway purposes on a definite route during a significant and uninterrupted period of time so as to effect actual physical modifications of the route and create a physically continuous and clearly defined and demarcated public highway.

   c. a significant number of vehicles were driven by non-federal entities on a definite route during a significant and uninterrupted period of time so as to effect actual physical modifications of the route and create a physically continuous and clearly demarcated public highway.

   For the purposes of NPS review, survey, planning, or pronouncement by public authorities does not constitute construction, and actual construction (as discussed above) initiated by such actions must have been effective at a time when the RS 2477 grant was available.

2. Documentation Required - For the purpose of NPS review, an RS 2477 assertion must be accompanied by sufficient evidence to document the construction of the asserted right-of-way. Documentation must clearly apply to the asserted right-of-way and clearly establish the act and effective date of construction. Examples of such documentation include but are not limited to:

   - dated expenditure records for actual construction;
   - dated expenditure records for maintenance;
   - dated photographic records of construction and maintenance;
   - dated aerial photography of accomplished construction;
   - dated media references to construction, maintenance, or the passage of vehicles;
   - affidavits by witnesses to the acts and dates of actual construction or maintenance;
   - affidavits by witnesses to the acts and dates of the passage of vehicles over time; and

- other dated records and documentation of actual construction, maintenance, or the passage of vehicles from local, state, and federal agencies, or other sources.

3. Determination of Construction - The NPS together with the Regional Solicitor if necessary, shall determine and record if an RS 2477 assertion sufficiently documents at least one of the definitions of construction provided above, and if so, the date by which such construction was in effect.

   If an assertion states and convincingly documents construction of a highway, and the stated and documented construction was in effect at a date the subject lands were unreserved public lands as determined in III.A.2., the NPS shall find that construction occurred for the purpose of accepting the RS 2477 grant.

   If an assertion fails to state and convincingly document the act of construction, or if the stated and documented construction was not in effect until a date the subject lands were reserved as determined in III.A.2., the NPS shall find that construction did not occur for the purpose of accepting the RS 2477 grant.

C. Public Highway

"The highway so constructed must be considered a public highway."

"A public highway is a definitive route or way that is freely open for all to use. It need not necessarily be open to vehicular traffic for a pedestrian or pack animal trail may qualify. A toll road or trail is still a public highway if the only limitation is the payment of the toll by all users. Multiple ways through a general area may not qualify as a definite route, however, evidence may show that one or another of the ways may qualify."

"The inclusion of a highway in a State, county, or municipal road system constitutes being a public highway."

"Expenditure of construction or maintenance money by an appropriate public body is evidence of the highway being a public highway."

"Absent evidence to the contrary, a statement by an appropriate public body that the highway was and still is considered a public highway will be accepted."

1. Public Highway Defined - All of the following conditions must have been met for a route to qualify as a public highway. A route must have been:

   a. physically continuous and clearly defined and demarcated;

   b. equally open to use by all members of the public;

   c. actually used as a public highway; and,

   d. if state law provided that an RS 2477 right-of-way must be accepted by an official act of a state or local government, the record must show the right-of-way was either:

      1) officially included in a state or local government public highway system at a time when the RS 2477 grant was available;

      2) unofficially included in a state or local government public highway system by virtue of substantial construction or maintenance expenditures on the asserted right-of-way by a state or local government with authority over and responsibility for public highways in the area of the asserted right-of-way at a time when the RS 2477 grant was available; or

      3) incontestably proclaimed by the asserting state or local government at the time of the assertion to have been a public highway at a time when the RS 2477 grant was available and to have remained a public highway from that time forward.

Note: Vacation, including relinquishment by proper authority, occurs in accordance with State, local or common law or Judicial precedence. For highways held by local governments, most states have procedural statutes for vacation proposal, hearing, and final order by the appropriate governmental entity. For those highways held by the "public in general," local statutes may or may not exist. Vacation or relinquishment, if in accordance with state law of an asserted RS 2477 right-of-way by an appropriate state or local government at any time previous to the assertion, shall disqualify the asserted right-of-way from public highway status.

Absent applicable federal, state, local, or common law to the contrary, the NPS shall consider RS 2477 rights-of-way to have been vacated, relinquished, or abandoned if there is demonstrable long-standing disuse of the right-of-way.

Questions of vacation, relinquishment or abandonment may be highly complex. The Regional Solicitor must be consulted early if such a claim is to be pursued.

2. Documentation Required - For the purpose of NPS review, an RS 2477 assertion must document the public nature of the asserted right-of-way including the past and current purposes, methods, and frequency of public use. Documentation must clearly apply to the asserted right-of-way and clearly establish the public nature and effective date of public use. Examples of such documentation include but are not limited to:

   - dated maps and survey records indicating a defined and demarcated public highway;
   - dated legislative or administrative proclamations adopting a right-of-way as part of a state or local government highway system;
   - dated expenditure records for construction or maintenance by an appropriate state or local government;
   - dated photographic records of public use;
   - dated media references to public use;
   - affidavits by witnesses to the public access to and use of the asserted RS 2477 right-of-way;
   - other records and documentation of public use from local, state, and federal agencies, or other sources; and
   - an incontestable statement by the asserting state or local government that the asserted right-of-way was and still is considered a public highway.

3. Determination of Public Nature of Highway - The NPS together with the Regional Solicitor if necessary, shall determine and record if an RS 2477 assertion sufficiently documents all of the conditions necessary for the asserted right-of-way to qualify as a public highway, and if so, the date by which the public nature of the asserted right-of-way was in effect.

If an assertion states and convincingly documents the public nature of an asserted right-of-way, the asserted right-of-way was never vacated, relinquished, or abandoned pursuant to applicable federal, state, local, or common law, and the stated and documented public nature of the asserted right-of-way was in effect and remained in effect during the dates the subject lands were unreserved public lands as determined in III.A.2., the NPS shall find that the asserted right-of-way was a public highway for the purpose of accepting the RS 2477 grant.

If an assertion fails to state and convincingly document the public nature of an asserted right-of-way, the asserted right-of-way was vacated, relinquished, or abandoned, or if the stated and documented public nature of the asserted right-of-way was not in effect or did not remain in effect until a date the subject lands were reserved as determined in III.A.2., the NPS shall find that the asserted right-of-way was not a public highway for the purpose of accepting the RS 2477 grant.

IV. REVIEW PROCEDURES

The NPS shall evaluate an RS 2477 assertion as outlined in Part III. and make a determination to either withhold or provide administrative recognition of the asserted RS 2477 right-of-way.

A. Determination to Withhold Administrative Recognition

1. Reviewing Office at Park or Regional Level - If an RS 2477 assertion does not include sufficient documentation to convincingly support the assertion and meet the above criteria, the reviewing NPS office shall draft a "Determination to Withhold Administrative Recognition." Such statements shall address the nature and extent of the assertion's deficiencies.

2. Regional Office Review - The reviewing NPS office shall submit each draft "Determination to Withhold Administrative Recognition" to the appropriate regional director for review.

   If the regional director does not concur with the draft "Determination to Withhold Administrative Recognition" the draft shall be returned to the reviewing NPS office for either additional evaluation and revision or drafting of a "Statement of Administrative Recognition" as may be appropriate. See Part IV.B. and Attachment A.

   If the regional director concurs with the draft "Determination to Withhold Administrative Recognition" the regional office shall sign the draft and return it to the superintendent.

3. Notifications - Following the return of a signed "Determination to Withhold Administrative Recognition" from the appropriate regional director, the superintendent shall make written notification to the asserting party and provide a copy of the signed "Determination to Withhold Administrative Recognition"

B. Determination to Provide Administrative Recognition

1. Reviewing Office at the Park or Regional Level - If an RS 2477 assertion includes sufficient documentation to convincingly support the assertion and meet the above criteria, the reviewing NPS office shall:

   a. determine the scope of the asserted RS 2477 right-of-way. See Attachment B.

   b. draft terms and conditions on the use of the asserted RS 2477 right-of-way as may be necessary to prevent degradation of the natural and cultural resources, associated values, and visitor use and enjoyment of lands under NPS jurisdiction, and comply with park planning documents. See Attachment C.

   c. draft a recommendation for administrative recognition in the form of an unsigned "Statement of Administrative Recognition." Such statements shall incorporate the determination of scope and terms and conditions on the use of the RS 2477 right-of-way required above. See Attachment A.

2. Regional Office Review - The reviewing NPS office shall submit recommendations for administrative recognition, in the form of an unsigned "Statement of Administrative Recognition" to the appropriate regional director for review.

   If the regional director does not concur with the recommendation, the recommendation shall be returned to the reviewing office for either a determination to withhold recognition, as described in IV.A., or additional evaluation as may be appropriate.

   If the regional director concurs with the recommendation, the regional director shall submit the recommendation for administrative recognition to the office of the appropriate regional solicitor for final approval of legal sufficiency.

3. Washington Office Review - Following final approval of legal sufficiency, the appropriate regional director shall submit four (4) copies of the recommendation for administrative recognition to the Director of the NPS. The Director of the NPS shall review all recommendations for administrative recognition.

If the Director of the NPS does not concur with the recommendation for administrative recognition, the recommendation shall be returned to the reviewing NPS office for either a determination to withhold recognition, as described in Part IV.A., or additional evaluation as may be appropriate.

If the Director of the NPS concurs with the recommendation for administrative recognition, the Director shall sign all four (4) copies of the "Statement of Administrative Recognition" and return three (3) signed copies to the reviewing NPS office.

4. Notifications - Following the return of three (3) signed copies of the "Statement of Administrative Recognition" from the Director of the NPS, the reviewing NPS office shall:

   a. submit two (2) signed copies to the superintendent. The superintendent shall transmit one copy to the asserting state or local government and retain one copy in park files.

   b. submit one (1) signed copy to the appropriate regional rights-of-way coordinator for regional office files.

   c. publish legal public notice of NPS administrative recognition of the asserted RS 2477 right-of-way.

   d. arrange for the recording of the administratively recognized RS 2477 right-of-way on the land status maps, including NPS land ownership maps, for each affected NPS unit.

   e. notify the appropriate office of the Bureau of Land Management.

C. Additional Review

The NPS reserves authority to accept and review additional documentation pertinent to RS 2477 determinations and, if warranted, change administrative determinations. A party may submit additional information to the superintendent only if such information could be reasonably expected to substantively alter the record and previous findings.

D. APPEAL

Acknowledgement or non-acknowledgement of the existence of an RS 2477 right-of-way is an administrative, not an adjudicative action, and is not subject to appeal.

A party wishing to contest an RS 2477 determination may file suit in a court of competent jurisdiction.

ATTACHMENT A

STATEMENT OF ADMINISTRATIVE RECOGNITION

A "Statement of Administrative Recognition" by the NPS for RS 2477 rights-of-way across NPS lands shall include:

A. identification of the asserting party, including all information required at Part II.A.1. above;

B. identification of the asserted right-of-way, including all information required at Part II.A.2. above;

C. findings pursuant to the criteria in Part III. above;

D. a determination of the scope of the asserted RS 2477 right-of-way pursuant to Attachment B.

E. terms and conditions for management of the asserted RS 2477 right-of-way pursuant to Attachment C.

F. a signature page for the Director of the NPS, including the following disclaimers:

> Administrative recognition of RS 2477 rights-of-way across National Park Service lands by the National Park Service does not grant any interest in land; such administrative recognition is an acknowledgment of the probable validity of a right-of-way established under RS 2477.
>
> The National Park Service reserves management authority over administratively recognized RS 2477 rights-of-way across National Park Service lands pursuant to applicable federal, state, local, and common law.

ATTACHMENT B

DETERMINATION OF SCOPE

I. BACKGROUND

Property rights may include the right to possess, use, dispose, transfer, encumber, exclude, or any other right of ownership. The scope of a right-of-way is that collection of property rights that have been granted to allow one party to cross the lands of another party. The U.S. Court of Appeals, Tenth Circuit, stated in footnote 9 of Sierra Club v. Hodel (Burr Trail), that,

> The "scope" of a right-of-way refers to the bundle of property rights possessed by the holder of the right-of-way. This bundle is defined by the physical boundaries of the right-of-way as well as the uses to which it has been put. 848 F.2d 1068 (10th Cir. 1988).

The scope of an RS 2477 right-of-way administratively recognized by the NPS is the set of property rights the NPS acknowledges were accepted by construction of a public highway across unreserved public lands before repeal of RS 2477. Only those property rights that could be lawfully accepted under applicable federal, state, local, and common law in effect at the latest time when the RS 2477 grant was available shall be administratively recognized by the NPS.

II. DETERMINATION

The reviewing NPS office shall determine the scope of asserted RS 2477 rights-of-way that will be recommended for administrative recognition by the NPS. Such determinations shall be included as part of any unsigned "Statement of Administrative Recognition" submitted as a recommendation for administrative recognition.

Determinations of scope shall address at least three elements from the bundle of property rights that constitute the scope of RS 2477 rights-of-way, including: width, use, and development.

A. Width

According to the Secretary of the Interior's policy statement on RS 2477, the width of an RS 2477 right-of-way administratively recognized by the NPS is to be determined in the following manner:

"For those highway R/Ws in the State, county, or municipal road system, i.e., the R/W is held and maintained by the appropriate government body, the width of the R/W is as specified for the type of highway under State law, if any, in force at the time the grant could be accepted."

"In some cases, the specific R/W may have been given a lesser or greater width at the time of creation of the public highway than that provide in State law."

"Where State law does not exist or is not applicable to the specific highway R/W, the width will be determined in the same manner as non-governmentally controlled highways."

"Where the highway R/W is not held by a local government or State law does not apply, the width is determined from the area, including appropriate back slopes, drainage ditches, etc., actually in use for the highway at the later of (1) acceptance of the grant or (2) loss of grant authority under RS 2477, e.g., repeal of RS 2477 on October 21, 1976, or an earlier removal of the land from the status of public lands not reserved for public uses."

Therefore, the reviewing NPS office shall determine the width of an asserted RS 2477 right-of-way that will be recommended for administrative recognition by one of the following methods, as appropriate:

5. if an asserted RS 2477 right-of-way that will be recommended for administrative recognition was either:

   a. officially included in a state or local government public highway system at the latest time when the RS 2477 grant was available, or

   b. unofficially included in a state or local government public highway system by virtue of substantial construction or maintenance expenditures on the asserted right-of-way by a state or local government with authority over and responsibility for public highways in the area of the asserted right-of-way at a time when the RS 2477 grant was available,

then the width of the RS 2477 right-of-way would be that width, if any, that attached to the right-of-way pursuant to the applicable state law, if any, in effect at the latest time when the RS 2477 grant was available.

NOTE: When applicable state law states that the width of an RS 2477 right-of-way is that width reasonable and necessary for the needs of the particular right-of-way, or terms to that effect, "reasonable and necessary" shall be defined by the circumstances and uses in effect, and width actually utilized for public highway purposes, including appropriate back slopes, drainage ditches, etc., at the latest time when the RS 2477 grant was available.

6. If an asserted RS 2477 right-of-way that will be recommended for administrative recognition was either:

   a. officially or unofficially included in a state or local public highway system, but no applicable state law was in effect at the latest time when the RS 2477 grant was available, or

   b. not included in a state or local public highway system at the latest time when the RS 2477 grant was available,

   then the width of the RS 2477 right-of-way is that width actually utilized for public highway purposes, including appropriate back slopes, drainage ditches, etc., at the latest time when the RS 2477 grant was available.

B. Use

Authorized use of a right-of-way typically extends to construction, operation, maintenance, and termination of facilities in support of the purpose of the right-of-way. RS 2477 was a grant of right-of-way for public highway purposes. Acceptance of the grant required construction of a public highway. According to the Secretary of the Interior's policy statement on RS 2477,

> "Facilities such as road drainage ditches, back and front slopes, turnouts, rest areas, and the like, that facilitate use of the highway by the public are considered part of the public highway R/W grant."

"Other facilities such as telephone lines, electric lines, etc., that were often placed along highways do not facilitate use of the highway and are not considered part of the public highway R/W grant...."

NOTE: BLM rules in effect prior to November 7, 1974, may have permitted such ancillary uses. Consult the Regional Solicitor. Proposals for new ancillary uses on recognized RS 2477 rights-of-way are handled under normal National Park Service procedures.

Therefore, the reviewing NPS office shall evaluate assertion documentation, other historical documentation identified during assertion review, and applicable federal, state, local, and common law to determine what uses properly attached to the right-of-way for public highway purposes at the latest time when the RS 2477 grant was available. Such determinations shall identify, as appropriate:

1. those uses facilitating public highway purposes that were supported by the asserted RS 2477 right-of-way as constructed at the latest time when the RS 2477 grant was available;

2. the intended, available, and actual modes of transportation supported by the asserted RS 2477 right-of-way as constructed at the latest time when the RS 2477 grant was available;

7. the seasonal patterns of public use supported by the asserted RS 2477 right-of-way as constructed at the latest time when the RS 2477 grant was available.

C. Development

The holder of a right-of-way may have a property right to modify, upgrade, or improve the facilities associated with the right-of-way. This right does not extend or apply outside or beyond the scope of the right-of-way.

Therefore, the reviewing NPS office shall determine the extent of any right to improve the asserted RS 477 right-of-way facilities based on:

1. the width of the RS 2477 right-of-way recommended for NPS administrative recognition as determined above;

2. the uses for public highway purposes that attached to the RS 2477 right-of-way recommended for NPS administrative recognition as determined above;

3. applicable federal, state, local, and common law.

Within the scope of administratively recognized RS 2477 rights-of-way, major modification, upgrading, or improvement of facilities shall require NPS compliance with the National Environmental Policy Act, the National Historic Preservation Act, and in Alaska, the Alaska National Interest Lands Conservation Act. Although the NPS may have no authority to deny such changes within the scope of RS 2477 rights-of-way, it does have a responsibility to prevent degradation of underlying and adjacent park lands. The U.S. Court of Appeals, Tenth Circuit, found in Sierra Club v. Hodel (Burr Trail) that the Bureau of Land Management had such responsibility with regards to Wilderness Study Areas (WSA) and stated that,

> ...when a proposed road improvement will impact a WSA the agency has the duty...to determine whether there are less degrading alternatives, and it has the responsibility to impose an alternative it deems less degrading upon the nonfederal actor. While this obligation is limited by BLM's inability to deny the improvement altogether, it is sufficient, we hold, to invoke NEPA requirements. 848 F.2d 1068 (10th Cir. 1988).

Outside the scope of administratively recognized RS 2477 rights-of-way, no expanded width, altered use, or improved facilities shall be permitted on NPS lands without appropriate additional authorization by the NPS and compliance with all applicable federal laws, including the National Environmental Policy Act, the National Historic Preservation Act, and in Alaska, the Alaska National Interest Lands Conservation Act. **In general, excepting specific language in park units' establishing legislation, the NPS is not authorized to grant rights-of-way across park lands for public highway purposes.**

ATTACHMENT C

TERMS AND CONDITIONS

I. AUTHORITY

The Organic Act of the National Park Service, 16 U.S.C. 1, and specific park enabling legislation require the NPS to manage lands to conserve scenic, natural, historic, and wildlife resources for enjoyment by future generations. Therefore, the NPS has the statutory authority and obligation to manage RS 2477 rights-of-way across NPS lands to prevent derogation of park values.

The Secretary of the Interior's RS 2477 policy (12/07/88) states in the section titled, "Responsibilities of Agency and Right-of-way Holder," that under RS 2477, the Department has management control over use of RS 2477 rights-of-way if unnecessary degradation of the servient estate can be demonstrated. The policy also states that the NPS may have even greater management authority over RS 2477 rights-of-way pursuant to other applicable law. Furthermore, the policy states that whereas RS 2477 did not authorize Departmental review and/or approval of reasonable activities within RS 2477 rights-of-way, such review and approval may be authorized by other applicable law. See Attachment E.

In U.S. v. Vogler, the U.S. Court of Appeals, Ninth Circuit, stated that both the Organic Act of the National Park Service, and the Mining in the Parks Act, 16 U.S.C. §1902, authorize the NPS to regulate use of RS 2477 rights-of-way to prevent derogation of park values. Regarding one alleged RS 2477 right-of-way, the Vogler court wrote that,

> Even if we assume that the trail is an established right of way, we do not accept Vogler's argument that the government is totally without authority to regulate the manner of its use.
>
> Congress has made it clear that the Secretary has broad power to regulate and manage national parks. The Secretary's power to regulate within a national park to "conserve the scenery and the nature and historic objects and wildlife therein...." applies with equal force to regulating an established right of way within the park. In Wilkenson v. Dept. of Interior, 634 F. Supp. 1265 (D. Colo. 1986), the district court of Colorado upheld the authority of the NPS to ban commercial access along an established RS 2477 right of way within the Colorado National Monument, and the court rejected an area resident's claim that the use of the road could not be regulated. The

court found the regulation to be well within the broad grant of power under 16 U.S.C. §1. Similarly, the regulations here are necessary to conserve the natural beauty of the Preserve; therefore, they lie within the government's power to regulate national parks. Moreover, the Mining in the Parks Act provides that "all activities resulting from the exercise of valid existing mineral rights on patented or unpatented mining claims within any area of the National Park System shall be subject to such regulations prescribed by the Secretary of the Interior as he deems necessary or desirable for the preservation and management of those areas." Thus, the government is not without authority to regulate the manner of Vogler's use of the Bielenberg trail. 859 F 2d 638 (9th Cir., 1988) [citations and footnotes omitted]

II. TERMS AND CONDITIONS

The reviewing NPS office shall draft terms and conditions on the construction, operation, maintenance, and termination of asserted RS 2477 rights-of-way that will be recommended for administrative recognition by the NPS. Such determinations shall be included as part of any unsigned "Statement of Administrative Recognition" submitted as a recommendation for administrative recognition. When appropriate, terms and conditions may also be incorporated in a Memorandum of Understanding between the NPS and state or local governments asserting RS 2477 rights-of-way.

Terms and conditions shall address all elements of asserted RS 2477 rights-of-way that will be recommended for administrative recognition necessary to prevent derogation of NPS values, and shall include, as appropriate:

A. requirements to comply with applicable federal, state, local, and common law, and applicable regulations;

B. requirements to limit use of the right-of-way to the purposes authorized pursuant to RS 2477, within the scope that will be administratively recognized by the NPS;

C. requirements to ensure that to the maximum extent feasible, RS 2477 rights-of-way are used in a manner compatible with the purposes for which affected NPS lands were established, and approved NPS management plans;

D. requirements to ensure that visitor use and enjoyment of park resources is protected in accordance with approved NPS management plans;

E. requirements for restoration, revegetation, and curtailment of erosion on lands affected by RS 2477 rights-of-way;

F. requirements to halt any activities with the potential to disturb or destroy archeological, paleontological, or historical resources upon discovery of such resources;

G. requirements for notification of appropriate park superintendents in writing not less than ten (10) working days prior to the start of construction, operation, maintenance, or termination of RS 2477 rights-of-way across NPS lands;

H. requirements to ensure that activities within RS 2477 rights-of-way will not violate applicable air and water quality standards and related facility siting standards established pursuant to law;

I. requirements for holders of RS 2477 rights-of-way to do everything reasonably within their power to prevent and suppress fires on or near such rights-of-way;

J. requirements to prevent damage to the environment, including damage to fish and wildlife habitats;

K. requirements to prevent hazards to public health and safety;

L. requirements to allow superintendents or other authorized NPS officials to enter and inspect RS 2477 rights-of-way without restriction;

M. requirements to employ measures to avoid or minimize adverse environmental or social impacts; and

N. in Alaska, requirements to protect the interests of those individuals living near RS 2477 rights-of-way who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes.

Terms and conditions may, for example:

- set minimum or maximum road standards for borrow sources, staging areas, materials storage, road surfaces, design speed, drainage systems, culverts, bridges, pullouts, turnarounds, signage, fencing, etc.;
- limit or prohibit certain types of vehicles,
- require or limit maintenance activities,
- provide for seasonal, temporary, or emergency closures,

- require resource monitoring and impact mitigation,
- require plans for activities within the scope of the right-of-way subject to written NPS approval,
- require compliance with applicable federal, state, local, or common law including the National Environmental Policy Act, the National Historic Preservation Act, and in Alaska, the Alaska National Interest Lands Conservation Act.

SAMPLE DOCUMENTS

I. Sample Public Notice and Press Release -- Beginning Review of an RS 2477 Assertion

II. Insufficiency/Sufficiency of Documentation

III. Determination to Withhold Administrative Recognition

IV. Statement of Administrative Recognition

V. Determination of Scope

VI. Terms and Conditions

VII. Final Public Notice -- Administrative Recognition of an RS 2477 Assertion

Public Notice (Sample)

Draft Press Release/Notice

Superintendent John O. Lancaster announced that Kane County has asserted a right-of-way for the Warm Creek Road within Glen Canyon National Recreation Area. Under an 1866 law called Revised Statute 2477, rights-of-way were granted for the purpose of establishing public highways. Although RS 2477 was repealed in 1976, controversies periodically arise regarding whether a public highway was established pursuant to the congressional grant under RS 2477.

In the management of Federal lands, it is necessary to determine the existence of public highway grants obtained under RS 2477. To determine this, the National Park Service (NPS) has developed an administrative process to evaluate the probable existence of these rights-of-way.

For an assertion to be acknowledged by the NPS, the road must have been constructed and maintained across public land for public use prior to the withdrawal of these lands from the public domain. For Kane County to have a right-of-way, the road must have been constructed prior to 1910.

The NPS has initiated a formal RS 2477 determination process for the Warm Creek Road inside Glen Canyon National Recreation Area. The road crosses the following lands:

T43S., R3E., SLM
Sec. 9, 10, 12-18

T43S.,R4E, SLM
Sec. 5-7

T42S., R4E., SLM
Sec. 31, 32

Anyone having information on the construction of the Warm Creek Road is urged to provide that information to Glen Canyon National Recreation Area. This information must be provided within 30 days of this notice.

For information on the specific route being reviewed, or if you have information that would assist the NPS in making the required RS 2477 determination, please contact Victor Knox, Chief, Division of Professional Services, Glen Canyon National Recreation Area, P. O. Box 1507, Page, Arizona 86040.

NOTE: This is a sample only. Other forms of public notification should be used as necessary.

II

INSUFFICIENCY/SUFFICIENCY OF DOCUMENTATION

We have received your assertion of the existence of a right-of-way along the _____ road pursuant to the authority of Section 8 of the Act of July 26, 1866, commonly known as Revised Statue (RS) 2477.

-THEN, EITHER-

Insufficient documentation was provided to allow us to proceed with a review of your assertion.

(HERE LIST THE DEFICIENCIES)

Upon receipt of this information, we will proceed with review and administrative determination.

-OR-

You appear to have provided sufficient information for us to begin the review process, although it may be that during such review, we may determine that further information/documentation will be necessary.

We will shortly publish a public notice of your assertion. The public will have thirty days from the date of such notice to provide information relative to this asserted right-of-way. An administrative determination as to the validity of this right-of-way will be made within a reasonable time thereafter.

III

DETERMINATION TO WITHHOLD ADMINISTRATIVE RECOGNITION

The National Park Service has examined the assertion that _____road was accepted by __(asserter)___ pursuant to Section 8 of the Act of July 26, 1866, commonly known as Revised Statute (RS) 2477.

We have, for administrative purposes only, determined that the Congressional Grant offered in RS 2477 over formerly public lands now administered by the NPS did not attach since:

USE APPROPRIATE PARAGRAPH

-Construction did not occur prior to the withdrawal of the land for_____park on _____.

-The road was not a public highway at the time the grant was available.

-The lands over which the road passes were reserved from ____(date)____ pursuant to _____, and thus not available for an RS 2477 grant.

Sincerely,

Regional Director

III (alternate)

DETERMINATION TO WITHHOLD ADMINISTRATIVE RECOGNITION

The National Park Service has examined the assertion that _____road was accepted by __(asserter)___ pursuant to Section 8 of the Act of July 26, 1866, commonly known as Revised Statute (RS) 2477.

We have, for administrative purposes only, determined that the _____road has been abandoned due to long-standing disuse of this road by the public.

The National Park Service does not recognize the existence of this claimed right-of-way.

Sincerely,

Regional Director

cc:
Bureau of Land Management State Office
Regional Solicitor

ACKNOWLEDGEMENT OF RIGHT-OF-WAY

Asserting party: (See Part II A.1.)

Identification asserted right-of-way: (See Part II A.2.)

The National Park Service has examined the assertion that the above-identified road was accepted as a public road by (asserter) pursuant to Section 8 of the Act of July 26, 1866, commonly known as Revised Statue (RS) 2477.

We have, for administrative purposes only, determined that (asserter) has accepted the Congressional Grant offered in RS 2477, over formerly public lands now administered by the NPS, for the above-identified road.

This administrative determination recognizes your right to operate and maintain, within the scope of the right-of-way as set forth in Attachment No. 1 hereto, and to terminate the _____ road.

Pursuant to the National Park Service Organic Act, Section 1 and/or the minining in the Parks Act, 16 U.S.C Section 1902, operation and maintenance of the _____ road within the scope of the right-of-way is further subject to the terms and conditions set forth in Attachment No. 2 hereto:

> Administrative recognition of RS 2477 rights-of-way across National Park Service lands by the National Park Service does not grant any interest in land; such administrative recognition is an acknowledgment of the probable validity of a right-of-way established under RS 2477.
>
> The National Park Service reserves management authority over administratively recognized RS 2477 rights-of-way across National Park Service lands pursuant to applicable federal, state, local, and common law.

This acknowledgement will be noted or the National Park Service's official land records and a copy will be provided to the Bureau of Land Management.

Sincerely,

Director
National Park Service

cc:
Bureau of Land Management State Office
Regional Solicitor

V

DETERMINATION OF THE SCOPE OF THE RIGHT-OF-WAY

Property rights may include the right to possess, use, dispose, transfer, encumber, exclude, or any other right of ownership. The scope of a right-of-way is that collection of property rights that have been granted to allow one party to cross the lands of another party. The U.S. Court of Appeals, Tenth Circuit, stated in footnote 9 of Sierra Club v. Hodel (Burr Trail), that,

> The "scope" of a right-of-way refers to the bundle of property rights possessed by the holder of the right-of-way. This bundle is defined by the physical boundaries of the right-of-way as well as the uses to which it has been put. 848 F.2d 1068 (10th Cir. 1988).

The scope of an RS 2477 right-of-way administratively recognized by the NPS is the set of property rights the NPS acknowledges were accepted by construction of a public highway across unreserved public lands before repeal of RS 2477. Only those property rights that could be lawfully accepted under applicable federal, state, local, and common law in effect at the latest time when the RS 2477 grant was available shall be administratively recognized by the NPS.

Determination of scope shall address at least three elements from the bundle of property rights that constitute the scope of RS 2477 rights-of-way, including: width, use, and development.

WIDTH: In accordance with Department of the Interior policy, we have determined that the width of the right-of-way is _____ _____. (May explain how width was determined, i.e., as defined by state law, area actually in use, etc.)

USE: (Define usage taking into account allowable considerations for changing technology, i.e., may have been animal-drawn vehicles originally, but we now use cars and trucks. In those instances where it was and remains a sled or pack trail, so state.)

DEVELOPMENT: (Normal maintenance, including realignment and reconstruction to no higher standard, within the right-of-way width must be recognized.)

Within the scope of administratively recognized RS 2477 rights-of-way, major modification, upgrading, or improvement of facilities shall require NPS compliance with the National Environmental Policy Act, the National Historic Preservation Act, and in Alaska, the Alaska National Interest Lands Conservation Act.

Outside the scope of administratively recognized RS 2477 rights-of-way, no expanded width, altered use, or improved facilities shall be permitted on NPS lands without appropriate additional authorization by the NPS and compliance with all applicable federal laws, including the National Environmental Policy Act, the National Historic Preservation Act, and in Alaska, the Alaska National Interest Lands Conservation Act. In general, excepting specific language in park units establishing legislation, the NPS is not authorized to grant rights-of-way across park lands for public highway purposes.

TERMS AND CONDITIONS

The Organic Act of the National Park Service, 16 U.S.C. 1, and specific park enabling legislation require the NPS to manage lands to conserve scenic, natural, historic, and wildlife resources for enjoyment by future generations. Therefore, the NPS has the statutory authority and obligation to manage RS 2477 rights-of-way across NPS lands to prevent derogation of park values.

The National Park Service has therefore, determined that the following terms and conditions are necessary:

(Develop with reference to Attachment C and with assistance of the Regional Solicitor.)

ATTACHMENT E

DEPARTMENT OF THE INTERIOR'S POLICY

THE SECRETARY OF THE INTERIOR
WASHINGTON

Memorandum

To: Secretary

From: Acting Assistant Secretary for Fish and Wildlife and Parks
Assistant Secretary for Land and Minerals Management

Subject: Departmental Policy on Section 8 of the Act of July 26, 1866, Revised Statute 2477 (Repealed), Grant of Right-of-Way for Public Highways (RS 2477)

Although RS 2477 was repealed nearly 12 years ago, controversies periodically arise regarding whether a public highway was established pursuant to the congressional grant under RS 2477 and the extent of rights obtained under that grant. Under RS 2477, the United States had (has) no duty or authority to adjudicate an assertion or application. However, it is necessary in the proper management of Federal lands to be able to recognize with some certainty the existence, or lack thereof, of public highway grants obtained under RS 2477.

With the passage of the Federal Land Policy and Management Act, the Bureau of Land Management (BLM) developed procedures, policy, and criteria for recognition, in cooperation with local governments, of the existance of such public highways and notation to the BLM's land records. This has allowed the BLM to develop land use plans and to make appropriate management decisions that consider the existence of these highway rights.

Issues have recently been raised by the State of Alaska and others which question not only the BLM policy but also the management actions by other bureaus within the Department. We have had the BLM review and report on the various issues and concerns (Attachment 2) and consulted with the State of Alaska, the BLM, the Fish and Wildlife Service, and the National Park Service.

We believe that the land management objectives of the Department will be improved with adoption of a Departmental policy and recommend that the attached policy (Attachment 1) be adopted for Departmentwide use.

Approve: Donald Paul Hodel — Disapprove: _____

Date: DEC 07 1988 — Date: _____

2-BLM Report

Celebrating the United States Constitution

RS 2477
Section 8 of the Act of July 26, 1866
Revised Statute 2477 (43 U.S.C. 932)
Repealed October 21, 1976

Section 8 of the Act of July 26, 1866, provided:

"The right of way for the construction of highways over public lands, not reserved for public uses, is hereby granted."

Although this statute, 43 U.S.C. 932 (RS 2477), was repealed by Title VII of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2793, many rights-of-way (R/W) for public highways obtained under the statute exist or may exist on lands administered by the Department and other Federal agencies. The existence or lack of existence of such highway R/Ws has material bearing on the development and implementation of management plans for conservation system units and other areas of Federal lands. Land managing Bureaus of the Department should develop, as appropriate, internal procedures for administratively recognizing those highways meeting the following criteria and recording such recognized highways on the land status records for the area managed by that Bureau.

Acceptance:

To constitute acceptance, all three conditions must have been met:

1. The lands involved must have been public lands, not reserved for public uses, at the time of acceptance.

2. Some form of construction of the highway must have occurred.

3. The highway so constructed must be considered a public highway.

Public lands, not reserved for public uses:

Public lands were those lands of the United States that were open to the operation of the various public land laws enacted by Congress.

Public lands, not reserved for public uses, do not include public lands reserved or dedicated by Act of Congress, Executive Order, Secretarial Order, or, in some cases, classification actions authorized by statute, during the existence of that reservation or dedication.

Public lands, not reserved for public uses, do not include public lands pre-empted or entered by settlers under the public land laws or located under the mining laws which ceased to be public lands during the pendancy of the entry, claim, or other.

Construction:

Construction must have occurred while the lands were public lands, not reserved for public uses.

Construction is a physical act of readying the highway for use by the public according to the available or intended mode of transportation - foot, horse, vehicle, etc. Removing high vegetation, moving large rocks out of the way, or filling low spots, etc., may be sufficient as construction for a particular case.

Survey, planning, or pronouncement by public authorities may initiate construction, but does not by itself, constitute construction. Construction must have been initiated prior to the repeal of RS 2477 and actual construction must have followed within a reasonable time.

Road maintenance over several years may equal actual construction.

The passage of vehicles by users over time may equal actual construction.

Public Highway:

A public highway is a definitive route or way that is freely open for all to use. It need not necessarily be open to vehicular traffic for a pedestrian or pack animal trail may qualify. A toll road or trail is still a public highway if the only limitation is the payment of the toll by all users. Multiple ways through a general area may not qualify as a definite route, however, evidence may show that one or another of the ways may qualify.

The inclusion of a highway in a State, county, or municipal road system constitutes being a public highway.

Expenditure of construction or maintenance money by an appropriate public body is evidence of the highway being a public highway.

Absent evidence to the contrary, a statement by an appropriate public body that the highway was and still is considered a public highway will be accepted.

Ancillary uses or facilities usual to public highways:

Facilities such as road drainage ditches, back and front slopes, turnouts, rest areas, and the like, that facilitate use of the highway by the public are considered part of the public highway R/W grant.

Other facilities such as telephone lines, electric lines, etc., that were often placed along highways do not facilitate use of the highway and are not considered part of the public highway R/W grant. An exception is the placement of such facilities along such R/W grants on lands administered by the Bureau of Land Management prior to November 7, 1974. Prior to this date, the requirement of filing an application for such facilities was waived. Any new facility, addition, modification of route, etc., after that date requires the filing of an application/permit for such facility. Facilities that were constructed, with permission of the R/W holder, between November 7, 1974, and the effective date of this policy, should, except in rare and unusual circumstances, be accommodated by issuance of a R/W or permit authorizing the continuance of such facility.

Width:

For those highway R/Ws in the State, county, or municipal road system, i.e., the R/W is held and maintained by the appropriate government body, the width of the R/W is as specified for the type of highway under State law, if any, in force at the time the grant could be accepted.

In some cases, the specific R7W may have been given a lesser or greater width at the time of creation of the public highway than that provided in State law.

Where State law does not exist or is not applicable to the specific highway R/W, the width will be determined in the same manner as below for non-governmentally controlled highways.

Where the highway R/W is not held by a local government or State law does not apply, the width is determined from the area, including appropriate back slopes, drainage ditches, etc., actually in use for the highway at the later of (1) acceptance of the grant or (2) loss of grant authority under RS 2477, e.g., repeal of RS 2477 on October 21, 1979, or an earlier removal of the land from the status of public lands not reserved for public uses.

Abandonment:

Abandonment, including relinquishment by proper authority, occurs in accordance with State, local or common law or judicial precedence.

Responsibilities of Agency and Right-of-Way Holder:

This policy addresses the creation and abandonment of property interests under RS 2477 and the respective property rights of the holder of a R/W and the owner of the servient estate.

Under the grant offered by RS 2477 and validly accepted, the interests of the Department are that of owner of the servient estate and adjacent lands/resources. In this context, the Department has no management control under RS 2477 over proper uses of the highway and highway R/W unless we can demonstrate unnecessary degradation of the servient estate. It should be noted, however, that this policy does not deal with the applicability, if any, of other federal, state, and/or local laws on the management or regulation of R/Ws reserved pursuant to RS 2477.

Reasonable activities within the highway R/W are within the jurisdiction of the holder. As such, the Department has no authority under RS 2477 to review and/or approve such reasonable activities. However, review and approval may or may not occur, depending upon the applicability, if any, of other federal, state, or local laws or general relevance to the use of a R/W.

2. Examples of Casual Use. Casual use may include the following activities and practices:

a. Recreation activities such as use of roads for hunting and sightseeing. This does not include driving in areas where vehicle use is prohibited.

b. Domestic uses or activities associated with managing ranches, farms, and rural residences includes trucking of products and use of support vehicles.

c. Ingress and egress on existing roads and trails.

d. Activities necessary to collect data for filing a right-of-way application such as vehicle use on existing roads, sampling, marking of routes or sites, including surveying or other activities that do not unduly disturb the surface or require the extensive removal of vegetation.

e. Minor activities or practices that have existed over a period of time without a grant and without causing appreciable disturbance to the public land resources or improvements.

B. Revised Statute 2477 (RS 2477). (See Departmental Policy Statement, RS 2477 in appendix 3.) The Act of July 26, 1866, RS 2477, repealed October 21, 1976, (formerly codified at 43 U.S.C. 932) provided: "The right of way for the construction of highways over public lands, not reserved for public use, is hereby granted." Acceptance of the grant occurred when a public highway was constructed on unreserved public lands. Holders of such rights-of-way shall be encouraged to have them acknowledged by having the BLM note the right-of-way on the records (MTP/ALMRS) in the same manner as other existing rights-of-way.

1. Criteria for Identification of RS 2477 Public Highway Rights-of-Way. Three conditions must must have occurred before October 21, 1976 (date of repeal) for BLM to acknowledge the existence of an RS 2477 right-of-way; the lands involved must have been public lands, not reserved for public uses, (called **unreserved public lands**) at the time of acceptance; some form of **construction** of the highway must have occurred; and the highway so constructed must be considered a **public highway**.

a. Unreserved Public Lands.

(1) Public lands of the United States that were open to the operation of the various public land laws enacted by Congress are considered unreserved public lands. Lands that were reserved or dedicated by an Act of Congress, Executive Order, Secretarial Order, or, in some cases, classification actions authorized by statute, were not subject to RS 2477 during the existence of the reservation or dedication. Likewise, lands preempted by settlers under the public land laws or located under the mining laws were not subject to RS 2477 during the pendency of the entry, claim, or other. The general withdrawals by Executive Orders 6910 and 6964 are not considered to have removed public lands from unreserved status.

(2) Between 1866 and 1976 it is possible that a single parcel of land was subject to and not subject to RS 2477 numerous times through various land status changes. Thus, a highway initiated while land was reserved might subsequently qualify under RS 2477 if the conditions were later met when the land returned to the status of unreserved public lands. Appropriate status must be checked relative to any highway being considered for acknowledgement.

b. Construction.

(1) Construction must have occurred, or have been initiated (actual construction must have followed within a reasonable time), while the lands were unreserved public lands. Construction is a physical act of readying the highway for use by the public according to the available or intended mode of transportation - foot, horse, vehicle, etc. Removing high vegetation, moving large rocks out of the way, or filling low spots, etc., may be sufficient as construction for a particular case. Road maintenance or the passage of vehicles by users over time may equal construction.

(2) Where construction was initiated by survey, planning, or pronouncement by public authority while the lands were unreserved public lands, actual construction could occur within a reasonable time even if the status of the land changed. Reasonable time must be determined in accordance with the specific conditions, i.e., one or two construction seasons for a minor county road, perhaps 3 to 5 years for a Federal-aid highway.

c. Public Highway. A public highway is a definite route or way that is freely open for all to use for the type of use intended. A toll road may be a public highway if the only limitation is the payment of the toll by all users. Roads or ways that have had access restricted to the public by locked gates or other means are not considered public highways. The inclusion of a highway in a State, county, or municipal road system constitutes it being a public highway. Absent evidence to the contrary, a statement by an appropriate public body that the highway was and is considered a public highway will be accepted.

NOTE: Appropriate local law must be considered in determining what constitutes a public highway; some jurisdictions allow or permit a public highway to exist with the general public; others may require a formal resolution by the State, county, or municipality adopting the road as a public highway.

2. Acknowledgment. Acknowledgment of the existence of an RS 2477 highway right-of-way is an administrative action and is not subject to appeal to the Interior Board of Land Appeals. Where conditions exist on public lands to support the acceptance of the Congressional grant, the Authorized Officer will issue a letter of acknowledgement and treat the highway as a valid use of the public lands. Where the evidence does not support acceptance, the Authorized Officer will inform the asserter, if any, that BLM does not recognize a highway. (Again, this is not a rejection and carries no right of appeal.)

3. Documenting RS 2477 Rights-of-Way. Minimal documentation, either submitted by the asserter/holder or developed by BLM, consists of (1) map(s), survey(s), aerial photography, or similar from which the location can be determined; (2) descriptive information to show that the highway was constructed on unreserved public lands; (3) information on public highway status; (4) the name and address of the asserter/holder, if known; and (5) where acknowledged by BLM, a copy of the acknowledgement letter to the holder or, where holder is unknown, a memorandum for the file.

a. For acknowledged RS 2477 righ -of-way, a case file must be established, a serial number assigned, and the official records noted. For State, county, or municipal RS 2477 rights-of-way, a single case file and serial number may be established for the individual entity (State of Idaho, Bingham County, Idaho, etc.) regardless of the number of separate RS 2477 rights-of-way held by that entity.

b. Where the authorized officer refused to acknowledge an RS 2477 right-of-way, a case file need not be established. However, discretion is advised. On controversial cases or where the material upon which the decision was based may be unrecoverable, establish a case file, assign a serial number, and close the case 30 days after the letter refusing to acknowledge the right-of-way has been issued.

4. Management Issues. Reasonable activities within the RS 2477 right-of-way are within the jurisdiction of the holder. These include, but are not necessarily limited to, maintenance, reconstruction, upgrading, and the like. Under RS 2477 BLM has no authority to review and/or approve such reasonable activities. BLM's concern is whether such activities are confined within the boundaries of the right-of-way or whether such activities are so extreme that they will cause unnecessary degradation of the servient estate. Activities beyond the boundaries may require a right-of-way or other authorization. Where unnecessary degradation is anticipated, BLM's recourse is to negotiate or, as a last resort, seek injunctive relief.

a. Width.

(1) For those RS 2477 rights-of-way in the State, county, or municipal road system, i.e., the right-of-way is held and maintained by the appropriate government body, the width of the right-of-way is as specified for the type of highway under State law, if any, in force at the latest time the grant could be accepted. The width may be specified by a general State statute, i.e., secondary roads are 60 feet in width, or may be very specific, i.e., the statute authorizing State Highway 1 specifies the width to be 200 feet. Some statutes may establish a width that is "reasonably necessary" for the needs of the particular road - a floating width. In these cases "reasonably necessary" is determined under the conditions existing on the date of repeal (October 21, 1976), or such earlier date when RS 2477 was no longer applicable to the parcel of land.

(2) Where the right-of-way is not held by a local government, or State law does not apply, the width is determined from the area, including appropriate back slopes, drainage ditches, etc., actually in use for the highway at the later of (1) acceptance of the grant or (2) loss of grant authority under RS 2477.

b. Ancillary Uses.

(1) Ancillary uses or facilities usual to public highways have historically involved electric transmission lines and communication lines located adjacent to but within the highway right-of-way. Prior to November 7, 1974, the holders of such facilities were not required to obtain permission from BLM, only from the holder of the highway right-of-way. Facilities constructed outside the highway right-of-way on or after November 7, 1974, require authorization from BLM.

(2) For ancillary facilities constructed prior to November 1974, place such information that is available, e.g., a copy of the highway holder's permission or similar documentation, in the RS 2477 case file. No further action is necessary.

(3) For ancillary facilities constructed subsequent to November 1974 with the highway holder's permission, BLM authorization is required, including payment for use during the period between construction and BLM authorization. It is Departmental policy that such facilities constructed between November 1974 and December 7, 1988, be accommodated by right-of-way or other authorization; removal or relocation will be considered only in rare and unusual circumstances and with prior approval of the Director (320).

(4) Ancillary facilities constructed outside the highway right-of-way, without the highway right-of-way holder's permission, or subsequent to December 7, 1988, are not authorized and appropriate action to resolve the unauthorized use situation should be undertaken.

c. Abandonment. Abandonment, including relinquishment by proper authority, occurs in accordance with State, local or common law or Judicial precedence. For highways held by local governments, most states have procedural statutes for abandonment proposal, hearing, and final order by the appropriate governmental entity. For those highways held by the "public in general," local statutes may or may not exist. Petitioning the appropriate governmental entity for abandonment of unnecessary RS 2477 highways is a tool available to BLM.

d. Conversion to Title V Highway Rights-of-Way. Due to the uncertain nature of RS 2477 highway rights-of-way, it may be mutually beneficial to BLM and the local highway entity to convert RS 2477 highway rights-of-way to Title V of FLPMA. This should be considered when the local highway entity seeks a Title V right-of-way to authorize partial realignment or similar action in conjunction with an RS 2477 right-of-way.

C. Access to Mining Claims. (Reserved)

D. Access to Salable Minerals. (Reserved)

E. Access to Leasable Minerals Other than Oil and Gas. (Reserved)

F. Fact Finders Act. Subsection 4P of the Act of December 5, 1924, (43 Stat. 704; 43 USC 417) authorizes the reservation of a right-of-way or easement to the United States over public land withdrawn for Bureau of Reclamation project purposes by the Bureau of Reclamation. Any needs for Bureau of Reclamation projects, not located on withdrawn public lands, shall be authorized with a FLPMA right-of-way grant. A Bureau of Land Management/Bureau of Reclamation Interagency Agreement dated March 25, 1983, establishes when this procedure will be used and the means by which reservations are made. The authorized officer shall note such reservations on the Master Title Plats. These reservations may be transferred or assigned to an irrigation district or to various water user groups by the Bureau of Reclamation.

G. Reservoirs, Canals, and Ditches under RS 2339 and RS 2340. The Act of July 26, 1866, as amended (formerly codified at 43 USC 661), granted rights-of-way on public land for reservoirs, canals, and ditches for the conveyance of water necessary for use in mining, agriculture, manufacturing, and other purposes. No right-of-way grant from BLM was necessary. The authority to use the public lands was contingent upon the holders obtaining a water right under the appropriate State laws. Holders of these grants shall be encouraged to have them acknowledged by having BLM note the rights-of-way on the records. The Act was repealed by FLPMA and all new reservoirs, canals, and ditches on public lands must be authorized by a FLPMA right-of-way grant.

1. Documenting Reservoirs, Canals, and Ditches Under RS 2339. The suggested procedure for acknowledging such rights-of-way in BLM records is as follows:

a. The person or entity wishing to have existing ditches, canals, or reservoirs noted to the public land records under RS 2339 should file a written request with the appropriate District or Resource Area Office. The request should include information on dates of construction, rights to water, and other pertinent information. A copy of the document evidencing the vested water right should also be filed. A suitable map should be included. No fees, reimbursement costs, or rentals are collected.

b. Review the documents filed to determine that the facility was constructed prior to October 21, 1976, and that a vested and accrued water right existed at the time of construction.

c. The request should be serialized and the documents assembled in a case file when a determination is made that a valid right-of-way under the 1866 Act exists. Send a letter to the proponent acknowledging receipt of the documents and stating that the request has been forwarded to the State Office for notation of the records.

d. The records will be noted and the file stored in conformance with the procedures of the particular State.

2. Reconstruction, Realignment, and Maintenance. The holder of a reservoir, canal, or ditch under RS 2339 and RS 2340 has the right to maintain the facility. The statute does not define the length, width, or extent of these rights-of-way. Reasonable maintenance activities shall be allowed. Any substantial realignment, relocation, or reconstruction of a facility must be authorized with a FLPMA right-of-way grant. Any surface disturbance not within an area previously disturbed by the facilities including construction, operation, or maintenance activities is considered realignment or reconstruction.

.49 Ingress and Egress.

A. Required Access. Pursuant to Section 1323(b) of ANILCA (16 USC 3210), BLM is required to allow access to nonfederally owned land surrounded by public land managed under FLPMA as necessary to secure to the owner the reasonable use and enjoyment thereof. Ingress and egress need not necessarily require the highest degree of access, but rather, a degree of access commensurate with the reasonable use and enjoyment of the non-Federal land. The access necessary for the reasonable use and enjoyment of the non-Federal land cannot be denied, so long as the landowner complies with the authorized officer's rules and regulations.

B. NEPA Analysis. The alternatives analyzed in the NEPA document do not have to be limited to proposed routes located entirely on public lands. An analysis of alternative routes may identify a route with less negative environmental impact, that entails the use of nonpublic lands. The proponent of the right-of-way and the owner of the potentially affected nonpublic lands should be personally informed of the results of the NEPA analysis. There should not be the slightest implication that BLM will require the use of the nonpublic lands.

C. Decision. The best route for the right-of-way should be granted, using a notice to proceed to prevent construction on the public land until the access across the nonpublic land is assured. When these situations arise, a well documented case file is essential and shall be maintained by the authorized officer.

United States Department of the Interior

BUREAU OF LAND MANAGEMENT
Utah State Office
324 South State, Suite 301
Salt Lake City, Utah 84111-2303

TAKE PRIDE IN AMERICA

2800
(U-942)

June 19, 1991

Instruction Memorandum No. UT 91-235
Expires 9/30/92

To: District Managers

From: State Director

Subject: BLM Utah R.S. 2477 Policy

The following is Bureau of Land Managements (BLM) Utah policy implementing the Secretary of the Interior's December 7, 1988, Policy on Revised Statute (R.S.) 2477 and the BLMs 2801 Manual.

This memorandum supersedes and replaces Instruction Memorandum UT 90-261.

Beginning with the Henry Mountain Resource Management Plan (RMP) and each RMP subsequently prepared, Utah BLM will, for administrative purposes only, address the presence or absence of R.S. 2477 rights-of-way on public lands. During preparation of the Management Situation Analysis (MSA), the District will inventory existing roads and issue letters of acknowledgement for R.S. 2477 rights-of-way that are administratively determined to be present on public lands within the RMP boundaries or issue findings of nonacceptance of R.S. 2477 grants where the congressional grant is administratively determined not to have attached.

No RMP or Management Framework Plan (MFP) will be amended solely for the purpose of making R.S. 2477 administrative determinations. Amendments to land use plans may address R.S. 2477s at the discretion of the District Manager.

Where the MFP or RMP has not considered R.S. 2477 rights-of-way, the authorized officer shall, on a case-by-case basis, make administrative determinations as to the status of rights-of-way across public lands when the presence or absence of a R.S. 2477 right-of-way is a factor in land use decisions.

All information developed by BLM or submitted to BLM concerning rights-of-way being administratively reviewed will be retained in the appropriate serialized case file and shall be available for public inspection. If the authorized officer issues a letter of acknowledgement, he or she shall forward a copy of the letter of acknowledgement and a map showing the location of the R.S. 2477 right-of-way to the BLM Utah State Office Division of Operations requesting that the Master Title Plats be noted. If the authorized officer issues a finding of nonacceptance of R.S. 2477 Grant, he or she is not required to forward a copy of finding to the BLM Utah State Office Division of Operations nor shall the Master Title Plats be noted for findings of nonacceptance of R.S. 2477 grant.

The authorized officer shall use the guidance in BLM Manual 2801.48B in making R.S. 2477 administrative determinations. The BLM Utah State Office Division of Operations will abstract the Historical Index to determine if public lands were reserved or unreserved between July 26, 1866, and October 21, 1976.

The authority to make administrative determinations for R.S. 2477 rights-of-way may be delegated to Resource Area Managers.

Notice of Intents (NOI) published for upcoming RMPs should note that BLM will be inventorying all existing roads in the subject planning area, including R.S. 2477 rights-of-way. For roads that are asserted by counties outside the MSA cycle of RMPs, appropriate public notification of at least 30 days should be made. The public notification will take the form of a listing of pending administrative determinations that are posted in the jurisdictional office and forwarded to other BLM Utah District Offices as well as the State Office Public Room. All notices of pending administrative determinations will be posted for public inspection from the date of receipt until the first of the month following the date of receipt. The list should be updated the first of every month. In instances where the authorized officer determines that an administrative determination must be issued in advance of the 30 days mentioned above, then a notice should be published in a newspaper of local circulation at least 1 week in advance of the administrative determination and notices sent to the BLM offices referenced above.

When a right-of-way is asserted for a road that crosses both BLM and National Park Service administered lands, the BLM shall coordinate with the National Park Service and issue a joint administrative determination or a finding of nonacceptance.

Where BLM administratively determines that a R.S. 2477 grant was accepted, BLM shall manage the public lands recognizing the valid right-of-way over the subject public lands. However, BLM may have additional management responsibilities for the underlying servient estate pursuant to Section 302(b) of FLPMA.

Where we find that the congressional grant did not attach for roads categorized by the State of Utah as Class B or Class C, BLM will offer to accept applications from the counties for FLPMA rights-of-way over the subject lands.

A determination by a State or Federal Court that all or a portion of the asserted right-of-way has been judicially determined to be a "road" is conclusive, and no additional administrative review is required. Such judicial determinations should be sent to the Utah State Office Division of Operations so that the records may be noted.

Attachment 1 to this memorandum is guidance relative to minimal requirements for the administrative record required for each administrative determination. The case file developed for each county must contain an individual factual determination sheet for each asserted ROW reviewed.

Attachment 2 to this memorandum is the format for letters of acknowledgement to the asserting county for class B and C roads.

Attachment 3 to this memorandum is the format for letters of acknowledgement to the asserting county for roads other than class B or C.

Attachment 4 to this memorandum is the format for findings of nonacceptance of R.S. 2477 grant.

Attachment 5 to this memorandum is the format for a combined letter of acknowledgement and finding of nonacceptance.

Questions on the policy may be directed to Ted D. Stephenson at FTS 581-4100 or commercial 801 539-4100.

ADMINISTRATIVE RECORD CHECK LIST

R.S. 2477 Administrative Determination for road _____

At a minimum, each assertion of a R.S. 2477 right-of-way must be reviewed and the three determining characteristics of acceptance of the congressional grant documented.

Each administrative record for each asserted R.S. 2477 right-of-way must contain the following headings and supportive documentation:

CONSTRUCTION prior to October 21, 1976:

Documentation addressing construction should include the county assertion. It may also include maintenance or other county records. Review of maps or aerial photographs, for example, U.S.G.S. topographic maps, Utah Department of Transportation maps, review of BLM records that might show existence or construction of the asserted right-of-way, exchange of use maintenance agreements between the BLM and the county, grazing files which might reference access by a particular road, etc. Other examples of documentation suitable to establish evidence of construction include affidavits from persons attesting to personal knowledge of the road or local newspaper articles from the appropriate dates describing the asserted road. Not all of these examples must be included in every record but some explanation of how we determined that there was construction, i.e., that the road existed on October 21, 1976.

For sole source or physically deteriorated documents such as old maps or mylar overlays, it is acceptable to reference the location of those documents and make them available for public inspection at the custodial office rather than damaging the document attempting to reproduce it for each administrative record for each asserted right-of-way.

PUBLIC HIGHWAY:

Documentation must be developed showing that the asserted right-of-way was considered a public highway. The county's assertion may be sufficient. Additional material may include county records, BLM records, or personal affidavits.

UNRESERVED PUBLIC LANDS:

Include the Historical Index Review performed by the Utah State Office Division of Operations in each case file.

Attachment 1

EXAMPLE FOR UTAH STATE, COUNTY, AND MUNICIPAL CLASS B & C ROADS

Letter of Acknowledgement

The Bureau of Land Management (BLM) has examined the assertion that _____ road was accepted by _____ County pursuant to Revised Statute (R.S.) 2477.

We have, for administrative purposes only, determined that _____ County has accepted the Congressional Grant offered in R. S. 2477 over public lands administered by the BLM for the ____County road.

This administrative determination recognizes the County's right to operate, maintain, to the extent that such county road was maintained on October 21, 1976, and terminate the County road. Any change in scope or alignment on public lands may require separate authorization from the BLM pursuant to Title V of the Federal Land Policy Management Act of October 21, 1976.

This acknowledgement will be noted on the BLM's official land records.

Sincerely,

Area Manager

Attachment 2

EXAMPLE OF LETTER OF ACKNOWLEDGEMENT FOR ROADS OTHER THAN CLASS B OR C

The Bureau of Land Management (BLM) has examined the assertion that _____ road was accepted by _____ County pursuant to Revised Statute (R.S.) 2477.

We have, for administrative purposes only, determined that the _____ County has accepted the Congressional Grant offered in R.S. 2477 over public lands administered by the BLM for the ____County road.

This administrative determination recognizes the County's right to operate, maintain, to the extent that such county road was maintained on October 21, 1976, and terminate the County road. Any change in scope or alignment on public lands will require separate authorization from the BLM pursuant to Title V of the Federal land Policy Management Act of October 21, 1976,

Pursuant to Section 302 (b) of FLPMA, you are required to inform us in advance of any new surface disturbing activity over public lands administered by BLM.

This acknowledgement will be noted on the BLM's official land records.

Sincerely,

Area Manager

Attachment 3

EXAMPLE OF FINDING OF NONACCEPTANCE OF R.S.2477 GRANT

Finding of Nonacceptance of R.S. 2477 Grant

The Bureau of Land Management (BLM) has examined the assertion that _____ road was accepted by _____ County pursuant to Revised Statute (R.S.) 2477.

We have, for administrative purposes only, determined that the Congressional Grant offered in R.S. 2477 over public lands administered by the BLM for the _____County road did not attach since:

USE APPROPRIATE PARAGRAPH

-Construction did not occur prior to (a) October 21, 1976, or (b) October 21, 1966.

-The road was not a public highway.

-The public lands over which the road crosses were reserved from_____pursuant to_____.

If the county wishes to make application for a Federal Land Policy Management Act Right-Of-Way for this road, you may make such application to_____.

Sincerely,

Area Manager

Attachment 4

EXAMPLE OF BOTH ACKNOWLEDGEMENT AND NONACCEPTANCE

Letter of Acknowledgement and Finding of Nonacceptance

The Bureau of Land Management (BLM) has examined the assertion that _____ road was accepted by _____ County pursuant to Revised Statute (R.S.) 2477.

We have, for administrative purposes only, determined that the _____ County has accepted the Congressional Grant offered in R.S. 2477 over the following public lands administered by the BLM for the ____County road.

This administrative determination recognizes the County's right to operate, maintain, to the extent that such county road was maintained on October 21, 1976, and terminate the County road on those public lands described above. Any change in scope or alignment on public lands may require separate authorization from the BLM pursuant to Title V of the Federal land Policy Management Act of October 21, 1976.

This acknowledgement will be noted on the BLM's official land records.

We have, for administrative purposes only, determined that the Congressional Grant offered in R.S. 2477 over the following described public lands administered by the BLM for the ____County road did not attach since:

USE APPROPRIATE PARAGRAPH:

-Construction did not occur prior to (a) October 21, 1976, or (b) October 21, 1966.

-The road was not a public highway.

-The public lands over which the road crosses were reserved from date to date pursuant to_____.

If the county wishes to make application for a Federal Land Policy Management Act Right-Of-Way for this road over the public lands determined not to have a R.S. 2477, you may make such application to_____.

Sincerely,

Area Manager

UNITED STATES DEPARTMENT OF THE INTERIOR

Bureau of Land Management
Alaska State Office
222 W. 7th Avenue, #13
Anchorage, Alaska 99513

2800 (932)

February 18, 1992

Instruction Memorandum No. AK 92-075
Expires: 09/30/93

To: DMs

From: State Director, Alaska

Subject: Guidelines for Processing R.S. 2477 Assertions

Since the State of Alaska is becoming more active in the filing of assertions of rights under R.S. 2477, we need to assure that we are ready to respond promptly and that all offices are using standardized procedures for handling of filings. For the purpose of R.S. 2477, "highway" is defined as a definite route or way that is freely open for all to use for the type of use intended. Historically, the term "highway" has been used to include such things as dog sled trails, foot trails, wagon roads, etc. These types of rights-of-way are acceptable if they meet the criteria set out below. The following guidelines for processing R.S. 2477 assertions should be followed:

1. Assertion filings should include the following items. (If all of the necessary information is not included in the initial filing, request the additional information needed from the person/office filing the assertion.)

   a. A map or aerial photograph of a scale 1:63,360 or better with the highway plotted on it. Maps of the scale 1:250,000 are not accurate enough to allow us to note our records.

   b. Date of construction of highway, if known, (must have been prior to October 21, 1976). If date of construction is unknown, date(s) of known use should be given.

c. Information as to who used the facility, when they used it, and how it is currently being used.

d. The actual constructed width of the Highway.

2. Review the BLM land records to see if the lands were unappropriated at the time of construction and if the lands are still under BLM jurisdiction. Lands not open to R.S. 2477 assertions include the following:

a. All lands in Alaska from December 13, 1968, (PLO 4582) through March 18, 1972 (90 days after ANCSA) and after March 28, 1974 (PLO 5418);

b. Lands which are segregated by reservations, Act of Congress, Executive Order, Secretarial Order, or, in some cases, classification actions authorized by statute, and;

c. Lands entered by settlers or located under the mining laws and lands included in allowed homestead entries which ceased to be public lands during the pendency of an entry or claim.

3. Review BLM land records, aerial photographs, and/or examine on the ground to determine when actual construction occurred. The term construction includes:

a. A process of clearing to make a route passable (i.e. removing vegetation or rocks, filling in low areas);

b. Road maintenance over several years, or expenditure of public funds;

c. The passage of vehicles by users over time.

4. Query the State Department of Natural Resources/ Department of Transportation and Public Facilities or other public body to determine if the highway was and still is a public highway. The determination that the route is a public highway includes the following elements:

a. It is freely open for all to use;

b. It is included as part of the State, Borough, or local road system;

c. Public funds have been expended for construction and/or maintenance.

5. Determine the extent of the right-of-way ancillary uses. Allowed uses include acreage for ditches, sloping, turnouts, and rest areas. (Unauthorized uses include

power or telephone lines after 1974.)

6. Establish a serialized case file and enter into AALMRS under Case Type 282201, if the R.S. 2477 is to be noted to the BLM records.

7. Prepare a letter to the person/office making the filing:

   a. Records are noted; OR

   b. Refuse to acknowledge the assertion (No Appeal Rights).

8. Compliance checks:

   a. Is there any degradation of the surface estate?

   b. Existence of a highway can be challenged at any time. Has the trail been litigated (matter for a court of competent jurisdiction, Federal or State)?

   c. Rerouting of highway, widening beyond State designated width, and installation of ancillary facilities requires a separate right-of-way grant.

FOR Edward F. Spang
State Director, Alaska
